Thread: [Spartan exploit spread your Fud EXE to : .doc .pdf .XML](#)

smokierobot - June 10, 2017, 8:53 am

By using this Spartan Exploit Builder you can easily convert your exe to .doc.pdf.exel It is coded by us from the early beginning and we use custom methods to provide a great stability for all Windows OS.Also the FUD is long in duration.You can import every exe file and attach to any email provider out there available for everyday use.Using Microsoft Office you get a huge rate of penetration success

I would lower the price since it is quite expensive which might reduce a lot of sales, you could probably make more profit from more lower-priced sales. But GLWS!

I doubt its true too. Such a zero day can not be "lifetime" as he claims, and would definitely not be sold for this cheap.

You understand that this tool drops files to the startup registry which means that it is backdoored, right? There is no other explanation. Why would a tool like this need to be added to the startup? It's ridiculous..

Do not buy and do not open. SIMPLE.

its probably something to make the exploit look like it works which will execute the exe aswell as the file. So people buying test it on their machines and claim it works, but then it won't work on other machines. This is just a huge scam.

Kisame? - June 15, 2017, 3:39 pm

It's backdoored and all vouches are fake. Probably accounts OP bought, or maybe accounts he hacked by giving them his backdoored exploit? I mean, all vouches have the same broken English... It is really obvious.

Anyway thread design is stolen, the files he gives after purchasing are a fake backdoored loginscreen and also the HWID grabber of a random crypter (DarkEye crypter).

Look at what he posted above. "Silend exploit"? He can't even spell it right, do you really think he can code a legit exploit?

If you buy this at this point then I hope you get backdoored and scammed. Honestly.

Let's hope this gets shut down asap.

I found even more proof. If you go to the website of that guy who got banned before (Smokierobots old account where he failed to even scam anyone) and you go to the website of his "exploit", and click "Purchase", it will redirect you to the exact same Rocketeer sales page as this thread...

/donePlease dont say you messaged Omni... Your gonna be on the savage of the week thread.

Dont message an admin because i was too stupid to trust someone :L Only reason why im posting so much on his thread is to stop others getting scammed aswell!

Your thread says that you are going to turn pdf's into exe's. Very professional. Also what CVE does this implement.

WARNING - THIS PROGRAM IS BACKDOORED, -

Close down the program completely.

Try move the exploit kit to another folder and it will inform you it is still in use (Hooked program) SO Then go to your task manager then kill process HP.exe (Malicious .exe).

What a fucking faggot. 10/10 scammer

Gf get banned scrub thank fuck you got banned

FuxXER - June 17, 2017, 11:53 am

Think carefully before buying any office exploit, microsoft already patched those exploits by window updates. So, the exploit you build might not working.

Vitani - June 17, 2017, 12:53 pm

Just to clarify for anyone reading this as I've gotten multiple messages regarding this already.

SpartanCrypter and/or me are in no way related to the OP or this product!

So the truth is that there is no way to find good working Office Exploit ? :) Maybe Private unique method allways up to date ? Explain me guys, how can i find working office exploit. Thanks

If you are looking for a zero day exploit, it would cost way too much. And you probably wouldn't find one on hack forums anyway. If you dont mind using a known exploit since you know your victim doesn't keep his software up to date, you can check:

You already said that 5 times by now, we get it.

SIM-2762393 - June 18, 2017, 10:11 am

Someone sent me the files to reverse it. The original file is binded to a rat then the original one is dropped and executed. Packed and obfuscated. After I deobfuscated and cracked it, it turned out to be nullcrypter that is sold here so it's basically all scam. For the people who gave vouches, I'd like to say for u fuck off with ur fake reviews.

You're correct. I was already suspecting some random HF crypter.. Lmao this is really cringeworthy.

SIM-2762393 - June 18, 2017, 1:22 pm

Yea :P it was also too weird for me to see legit working code while the guy actually scammed. So it turned out to be a crypter not a exploit kit lol

Yea true. I was already suspecting a scam from the moment I saw his broken English and the similar vouches beneath it. That was followed up by him telling people to send them his HWID after he sent them the HWID grabber of DarkEye, lol.

Honestly it's kinda stupid people fell for it. The guy bought I33t before he even posted something, nobody does that without intent to scam.

SIM-2762393 - June 18, 2017, 4:06 pm

Well I guess he won thousands from that lol. The mods must give us his IP and dox his ass :D

I just tricked his ass on Skype and got some of the money he stole back (235\$), lmao. I feel bad but he had it coming. Anyway I also got his dox (IP and e-mail)... Because I made him purchase from a fake rocketr link. He fell for the same scam he uses.

He also asked me why I exposed him, and he also told me that he backdoored the Spartan builder. Ill post the full conversation tomorrow.

I honestly detest scam but this money isn't even his. He stole it from my friend, Liam.

It's ironic.

Lextian - June 19, 2017, 9:00 am

LOL this is really funny, am glad i took my time to wait for some legit vouches as i suspected all the above vouches were fakes and from friends, well to those who left those vouches You Suck.

Please stop giving fake vouches on threads that you never bought the products, am sure those people giving the vouches are somehow involved in this scam.

The guy made a new thread for a 500\$ botnet on a new account, I found out the vouches were exactly the same and collected enough proof to get his new account banned before he could scam anyone. He already bought L33T and EP1C at that point, hahaha. Before he could scam anyone I msg'd Omni and his account + his 4 fake vouch accounts (probably hacked/stolen/other scammers) all got closed aswell, lmao...

Then I continued talking with him on Skype to have some revenge on the cunt..

<https://paste.ee/r/TmvuO/O>

I don't support scamming, but this guy had it coming.

PMed you my Skype. Feel free to add me.

I guess this guy won't show his face here for a while. He lost all his hacked/stolen accounts to give fake vouches with, so he won't be able to pull another scam like this.

I guess this thread can be closed if an admin would ^^

Are you mentally retarded? The guy who did this came back on another account with another scam thread and Omni closed him and his 4 friends. He even admitted on Skype that he was scamming and backdoored the file, if you'd read the chatlogs above.

OP is a scammer and it has been undeniably proven.

How much proof is needed?

Also maybe the file you reversed was not original, you have to think about all possible solutions. It is original and I checked megadumper to also see all the files and see which is .net and what is not. It is the original file. And I won't share the file. Want some proofs go get the file yourself

The OP is banned. You don't need to post on the thread giving a vouch.

He was banned for scamming, So how the hell have you got a working version -.- Go get yourself some more post count elsewhere.
