Thread: [\[Review\] "Multi SMTP Email Sender" by Weco](#)

Mr. Reviewer - June 10, 2017, 3:00 pm

BEFORE YOU READ THE REVIEW

Spoiler [\(Click to View\)](#)

-You must understand that the reviews I make are from my point of view.If I grade 3/10 that doesn't mean the method itself is bad, maybe for other people that method is 7, so keep this in mind when you're reading my reviews.

-My reviews will probably piss off many people and break some of their businesses ...or raise them.This means I will not debate with the sellers whether or not my reviews are accurate.Unless there is really something wrong I won't recheck my analysis.

-I review good and bad products, not only bad products as some of you may suspect.In the end, remains the decision of the reader if it's bad or good.

FAQ

Who am I?Spoiler [\(Click to View\)](#)

-A random guy that bought dozens of methods in the past few months from HackForums Sellers, and with disappointment, I announce that 90% don't work or they require insane hard work to even get them started. Highly "vouched" methods, with "valid proofs" from so highly upper-class "highly vouched members/old members" or how you want to call them, methods that look good on paper but on practice leave you with a sour taste in your mouth and with dust in your wallet.

-For those that keep asking me, "who I am and how I buy for months but my account is only for a week". I've been on hackforums for awhile now, my first account was around 2009 but was disabled due to inactivity. I kept coming back.Never engaged in topics too much.Until 1'st May when I decided I should make reviews about products.

What I'm going to show you?Spoiler [\(Click to View\)](#)

Few angles to look at when you're buying a method and few insights of what each method consists of.

I will keep this short and say this - you don't have to become an investigator but in the end is YOUR money and YOUR time you're going to throw at a random guy that promises you the moon.

Want a similar review about your product?Spoiler [\(Click to View\)](#)

-Review from an unbiased, neutral perspective.

-Everything will be analyzed, as you'll see in this thread.

Files:

- Contains 1 .exe with the product.

REVIEW:

Vouches:

Spoiler [\(Click to View\)](#)

0 Legit Vouches. - Vouches containing proofs.

3 Neutral Vouches. - usually Textproofs: "it works, legit, best product I bought,etc"

0 Complaints, refund requests. - self explanatory.

This is rated as an Email Sender program not a money making one.

Proofs:

Spoiler ([Click to View](#))

8/10

Provides proofs of his own product.

Personal review:

About the product:

Spoiler ([Click to View](#))

The Email Sender

Design GUI:

The design's quite simple but at first especially if you're new to this type of things you'll be a bit confused until you understand what each option does.

Difficulty

After you understand how things go the process it's quite simple and straightforward.

In order to have access to the product you'll have to register with your email on his website.

Efficiency

-I used a GMAIL sender due to easy access (username/pass) , if you have another email provider(Yahoo,Mail,etc) you'll need few more things such as SMTP and port.

You have to google them.

-Your Email and password are needed inside the program.

Other

-The email message that you send can be edited only in HTML language (<p>Paragraph</p> , Bold , <i>Italic</i>) .

Also, supports file attachments and provides few variable examples to improve your message.

-Has a log that explains if something goes wrong, what doesn't work, if the message is sent or not.

-If one of your accounts has an error (limit quota reached, invalid etc) it's skipped.

-You can spoof your Email name sender and address.

-And the most important feature is the SMTP List.

About the seller:

Spoiler ([Click to View](#))

8.5/10

-According to the seller if you don't want your message to enter spam it depends on SMTP and the content of the message.

-What he advertises that's what you get.

-Overall it seems like a genuine effort from the seller and that's a big plus.

-Offers [support](#) for his products. In case you encountered a bug or something with his products.

-The product it's based on a license. This means if you upset the seller you can get your product terminated.

Provides proofs of his own products.

This grade reviews his way of advertising, addressing to potential customers and his way of convincing them and also the relation between him and his product.

Mr. Reviewer - June 12, 2017, 1:47 pm

Due to some suspicious things I have found in -some- products, I will provide also a Virustotal scan and will post the results inside the reviews. I know Virustotal MAY raise unnecessary red flags but is better to be safe than sorry.
