Thread: [Sending multiple screenshots to email \[VB.NET\]](#)

George Bin Laden - June 10, 2017, 3:22 pm

The problem is solved thank you very much :)

(Jun 10, 2017 03:36 PM)Orka Wrote: [\[CITE\]](#) The mail attachment is a collection, you can call the add method multiple times.

I also confirm with Okra, here is the MSDN for reference.

[msdn.microsoft.com/en-us/library/system.net.mail.attachment\(v=vs.110\).aspx](http://msdn.microsoft.com/en-us/library/system.net.mail.attachment(v=vs.110).aspx)

Rhez - June 10, 2017, 5:40 pm

Just loop the way how add attachment.

George Bin Laden - June 11, 2017, 2:31 am

So do I create more picture boxes and add the same command in them?

The problem is they are all under the same timer (that sends the mail) that runs every 1 minute. Looping how I add the attachment would just give me more identical screenshots as they are all being executed under the same timer.

What should I do?

George Bin Laden - June 11, 2017, 4:03 am

I managed to solve it, took a bit of time but got there in the end :D Thanks.

fxbgghacker - June 11, 2017, 8:26 am

I was going to suggest using system hooks instead of screenshots every x seconds. taking screenshots and pushing them through the network so fast will eventually be an issue (for several reasons).

check out the MSDN for hooks,

You should say at least thank you and DON'T take credit for it.
