Black Shadow - June 11, 2017, 1:42 am

Just thought I would show you guys how easy it is.

I put \$50 in to start with yesterday when I made the other [thread](#) and this \$3000 is still increasing I have been up for 20 hours.

This is just one of my accounts

Go to this thread to see what it was on yesterday

<https://hackforums.net/showthread.php?tid=5641185>

Here are the accounts and conversion

I count the bits on both accounts x that by the BTC price to convert to \$ then convert to £

Knucklez- - June 11, 2017, 3:10 am

I'm contemplating whether I should just purchase a few lessons of your service and then go ahead and leave an HONEST review just for the satisfaction of other members here. I'm not looking to promote nor destroy your business, but you've been receiving a lot of criticism and reviewing your past history my offer may be somewhat worthy for you.

Would you be willing to mentor me at a discounted price as I'd be the "first" buyer? Let me know via inbox as soon as possible. I must take the kids out to visit the zoo so I may happen to be inactive if you don't message me within the next 40 odd minutes.

IKR I've been on/off for almost a year and it's still going on...it's almost as if he has a.....gambling....addiction????

Past results are no indicators of future success. Yes, gambling is easy and if everyone could rinse and repeat they would - but they don't, because they know the house always wins in the long term so your one off wins and lucky streaks aren't really bragging rights.

Gambling is also easy if you start off with a big bank roll, play some easy odds (1.30/2.00) for a bit and then walk away, but we know that never happens.

Bragging rights used to show off the car you brought, the really awesome method that won't be saturated. We've come to posting lucky gambling streaks? Look at that chart, you literally almost crapped out at the start and if you bank roll wasn't big enough you would have never had that streak.

Quote:I have never stopped I have watched the game for 12 months and know how to play it better than anyone.

Right, out of all the smart people in the world you know how to play this game better lmao. Holy crap man, you are delusional as hell.

Quote:How is it scamming people lol.

Your misleading people. You don't have a "method" what you have is lucky streaks.....using this thread to boost attention to your sales thread is scummy as fuck.

"Gambling mentoring".....bruh read that back to yourself. It's GAMBLING, it doesn't take skill it just takes balls to know that you could lose your money but there's also a chance that it could go the way. This isn't poker. It's Bustabit. A website that's designed to make profit and has been making profit for a very long time. Vegas wasn't built on winners.

He claims Bustabit isn't gambling so idk man, this is why I avoid his threads, he just changes the meaning of things and claims profit when he's hiding all his negative accounts.

I should go bet 1k on every horse in a horse race and then post the winning from the 1 horse.

One thing I can say is it's impressive you've made it to 4.1m bits profit, but it's as impressive knowing about all your other accounts.

What is your NET profit on all your accounts?

Being up in USD doesn't mean anything really.... Only if your NET profit in Bits is highly positive it would be significant.

Being up in USD can just mean you had a long lucky streak at a time the BTC price is high.

For example > Lose 10 BTC at \$500 per BTC > Win 4 BTC at \$2869 (current price) - That would mean you profited \$6k but purely because you had a lucky streak at the right moment in time. Doesn't mean your Bustabit method works otherwise you would be making a constant profit.

I am now fully convinced that this guy is delusional, I wasn't 100% sure before but when he said;

"I know gambling is different" and the contradicted himself with "I know Bustabit is different, I've been watching it"

Looooooooool bruh. Bustabit is NOT different because it's still the most profitable gambling site because people like you think lucky streaks are an indication you've beaten the game.

Anything that's said to you is just fueling your delusions. Seriously guys, don't feed the troll - because if a guy on HF thinks he's beating Bustabit, then surely he must have all the answers and will never lose ever - just like when the site was having a "bad day"

- No evidence that your method isn't lucky.
- We all know gambling is based on a chance. One win, does not mean you will win again. The house has an edge for a reason, because the longer you play the more likely you are to lose and that will apply to ANY "method"

Don't believe me? Okay, you give me \$50, show me your "method" and if it works for longer than a week without me going bust, you can keep all the profits and I'll give \$500 out of my own pocket. If

not, I'll put up \$50 of my own money and you put \$500 in escrow. If your method busts or is proven to be a failure, \$500 is released to me. You can leave the funds with Omni if you don't trust staff and I'll live stream the whole thing :) deal? Probably not, you can't seem to predict when they'll have bad days so that might be a risk to you. Well, let me know if you want to put your money where your mouth is.
