Thread: [Private stub/crypter for netwire](#)

Rhodos - June 11, 2017, 2:52 am

Halo guys! Looking for a crypter/private stub that is compatible with netwire (MAC OS X and Windows), any advice? Thanks!

Mirakuru - June 11, 2017, 2:53 am

for Windows;

DarkEye Protector

<https://hackforums.net/private.php?action=send&uid=815887>

Broad Crypter

broadsupport@jabber.ru

I have no idea for macOS.

faxxgrid - August 4, 2017, 6:27 am

Rhodos, Did bought the Broad crypter? How does it work for Netwire? Please can you advise? I am also looking for a native crypter. I just bought Netwire....

Rhodos - August 5, 2017, 2:12 am

No my friend, i didnt buy it cause its 2200\$ C++ version/month

Wow that's expensive. I'd say get darkeye protector and ask for a private stub, no idea what it's cost though

? [\$(1000)\$] ? - August 5, 2017, 9:29 am

Go to the crypter action and look dude...

There are plenty of crypters that offer private stubs...

No need to make a thread about it lol

faxxgrid - August 5, 2017, 2:10 pm

Thank you \$1000\$ for the information about where to find crypters

Fulya Donmez - August 6, 2017, 10:49 am

Look know more dude buy DarkEye it works with Netwire

faxxgrid - August 7, 2017, 4:41 am

Hi Fulya,

Please get you send me link of where to buy DarkEye...

Purple Kief - August 7, 2017, 4:45 am

I'm not vouching for this product, just providing the link.

faxxgrid - August 7, 2017, 12:18 pm

Thank you Purple Kief for the info and link. I appreciate.

Good job @Purple

faxxgrid - August 8, 2017, 2:13 am

Check your PM @ Fulya. Thank you
