For me, some of them are a bit too grungy, especially the first three. I think that they should look a little more clear with some contrasting colours.

Nonetheless, they look like you have put a lot of effort into them!

Posting opinion in a sec.

I like the design but on the 4th picture the text just doesn't fit the logo.

Most of them or too much for my taste.

Kinda grungy and not that clear. But as a design seems nice.

Don't add too much stuff on a good scetch because it's getting lost in the background.

Keep up the good work!

They are really grungy and low quality from what I've seen. Do you work with 3D softwares and then switch to Photoshop? Or you simply use the 3D function from it? I would recommend a calligraphy tutorial if you're willing to go for banners and such on social media. Incorporate a well though usage of c4ds which can be found all around the web. Keep your designs clean, even if you have to use a crowded background. There was no reason to use printscreens instead of imgur. No one's going to steal anything in this section. I want to see you come up with something new and post it here. I want improvement. Show me that.

Looks a little weird but you will get there eventually.
