Thread: [\[RELEASE\] HEROXOR - ENCRYPTION | FREE | SECURE | SIMPLY FANCY](#)

XENOTpro - June 11, 2017, 8:44 am

-
What's HEROXOR?

HEROXOR is a encryption method, developed by XENOT, which allows to encrypt a string or base64 data using a key.

To encrypt a string, all you need to do is to enter your string and a key.

What's special about HEROXOR?

HEROXOR support 5 different encryption "levels" which result in 5 different looking outputs. Some of them are very compact and interesting looking and others result in a huge output sting and look very obfuscated.

What features does it have?

[?] 5 different levels

You can choose between 5 different levels.

[?] Symetric

Encryption & Decryption can be done with a single key. [?] File support

You can choose between encrypting a text and encrypting an entire file

[?] Online

The encryption takes part on our secured server.

[?] API

We provide an API with all 5 levels.

Coming soon!

[SOON] Store data online

Your data can be stored online in order to get a very compact output (optional)

[SOON] Autodestruct

Encrypted data can be auto-destructed after a certain time of failed decrypt attempts (optional)

[SOON] Anti-Brute-force

After failed decrypt attempts, decryption is slowed doen to prevent from bruteforce attacks (optional)

CHANGELOG

- Added support for files - API-Changes: The "data"-parameter is now sent via POST request - New background image [To get more informations about XENOT and our projects visit our website!](#)

XENOTpro - December 18, 2017, 12:24 pm

A new project has just been released! Check it out!

goop333 - December 18, 2017, 2:43 pm

Nice stuff, good luck with the sale

XENOTpro - December 18, 2017, 3:22 pm

It's free. You don't have to buy anything :)

XENOTpro - December 24, 2017, 4:44 am

This project was updated recently! The following features have been added:

- Files are now supported!: You can now choose between encrypting a text and encrypting an entire file!

Nice! Why you don't add the change log in the OP as well? Have a nice day buddy ?

XENOTpro - December 24, 2017, 4:59 am

The change log has been added. ;)
