Thread: [Upgraded my account and still seeing Captchas](#)

Cyber Knight - June 11, 2017, 10:44 am

I upgraded my account to max. available because I didn't want to face limitations. I am still seeing captchas while sending messages to members.

How do I get hold of that? Is there some sort of addon?

Thanks.

?ndrew - June 11, 2017, 10:45 am

AFAIK you need 25 posts to PM

Damn. I thought it would be removed upon upgrade.

No it is not. It's the only minimum to make legit PM's. Just post a few more HQ posts and you should be fine.

Wow. Just realized :/

NurSpec - June 11, 2017, 11:14 am

Just get your post count up. You should also look into purchasing EP1C as there are some fantastic features to be obtained from the group.

Are you using a tablet or just an AWS service? Most proxies and VPNs will experience extra CAPTCHA when viewing HF.
