Thread: [Unlimited data through Wikipedia is it possible?](#)

Massixhacks - June 11, 2017, 12:04 pm

Hello my data plan includes an unlimited Wikipedia surfing so i was wondering is it possible in some way to fool the data provider in a way that you surf any website through Wikipedia which will make you have unlimited data ?

Jetty - June 12, 2017, 12:32 am

Found anything on this yet?

Massixhacks - June 12, 2017, 3:54 am

Not yet :(hoping to find something soon

Mr. Robot - June 12, 2017, 3:55 am

I would imagine they just have a service on their end that allows IPs from your ISP to browse wikipedia. Doubt there is anything you can do sorry.

Massixhacks - June 12, 2017, 12:16 pm

Got this in pm what do you think guys ?

PM: You can try doing this: registering a domain [Wikipedia.org.any-domain.com](#)

Loading a proxy server over FTP and by accessing [Wikipedia.org.any-domain.com](#) you might be able to access any website where the firewall is thinking it's access wikipedia.

Facebook . - June 12, 2017, 12:31 pm

use http injector , make your wikipedia as a header then connect to a ssh server.

Massixhacks - June 12, 2017, 1:07 pm

Im so sorry but i need more information please:(

FNetV1 - October 23, 2017, 9:07 pm

Short of Wikipedia in the future offering a CGI web proxy service (a web based proxy that uses wikipedia's own IP address to render your website in an iFrame or iFrame like section within a Wikipedia Page, eg: `h t t p s :`

`://wikipedia.com/cgi-proxy-cookies=enable&java=enable&flash-enable&javascript=enable?url=http://google.com)`, or a VPN proxy that uses wikipedia's own IP address, then I dont see how it would be possible.

ejshadow - October 24, 2017, 1:52 am

I do have access to the ISP page and I can send/receive text content from Telegram. Would there be any way how to make use of it to surf the internet?

THnx

Zar66661 - October 24, 2017, 2:29 am

Id try using AirVPN to connect to port 80 and hope it goes through.

But if its ip specific, try the refferrers or domain trick..

GI op.

macmaltom123 - *October 27, 2017, 9:46 pm*

I've tried but have not been able to really get anything out of it
