Thread: [Budokai-Online - Online Multiplayer Game | Free-to-play](#)

Charaoh - June 11, 2017, 1:34 pm

What is Budokai-Online?

[Budokai-Online](#) is a fan-made turn-based multiplayer game based on the Dragon Ball Universe. Players are able to go head-to-head to achieve victory in besting your opponent in a 3v3 battle with your favorite characters from the series! It is a game designed to have both players take into account their character's stats and make their moves simultaneously to represent the gripping decision making involved in each move you do.

How do we play the game?

The game starts off by delving into the world system called the Dragonverse. Here you are capable of joining a race (Human, Hitmen, Cold, etc.) in which you get to represent. This leads you to host or join a Society for that specific race where you could play with others, invite your friends or opt-out as a lone wolf. After being integrated into the Dragonverse you'll be able to customize and configure a team and head straight into a Ranked or Private Match. The objective of our game is to bring all of your opponent's characters HP down to zero or have your opponent surrender the match. In order to do that you must take into account both your team and the enemy team's characters, their stats (Strength, Ki, Defense, Speed) and any transformations impact characters. To get a better representation of how to play Budokai-Online you can check out our Game Manual located on the [site](#).

What features are available?

We have updated the game with new content and features and decided to bring forth a new game that we feel everyone would enjoy. Some of the features consists of:

Capsule Corp

The Capsule Corp is where players spend their earned income (Zennie) on new characters, skills, and items. Zennie can be obtained from playing the game, participating in events or premium content. Capsule Corp is your go-to place when you want to increase your roster of characters and skills.

Team Builder

The Team Builder is where players modify their teams for battle. Here, players can select which characters and skills they would like to use as well as assign an item of their wanting. Team Builder also has a preset team option which is useful for players who likes to create different combinations of characters and strategies.

Dragonverse

The Dragonverse is where the social aspect of the game happens. Here, players can control their planetary actions such as society settings, view allies, wage wars against other societies and more importantly, utilize the features in the ingame.

The Ingame

The ingame was given a fresh start when it was updated with new content and features. Once inside, players will see both their team and enemy team, items if accessible, player ranks, and other animations that are appealing to the game overall.

We hope everyone enjoy their time while exploring [Budokai-Online](#) and you can expect even more content and updates in the near future!

Event 1 has been extended to commemorate for newly registered players. Still looking for new testers! Join today

Yui-Senpai - June 18, 2017, 11:54 am

Joining now love DB. Ill tell my friends to get if its any good.

<http://prntscr.com/flac3r> pretty confused on what is going on

Can not find a match :c how many players?

SoulInPain - June 19, 2017, 11:17 am

Seems nice on first view gg guys
