Thread: [Gift From Mr. Blackhat EMail Bomber Text Bomber FREE FREE](#)

Blackhatlegion - June 12, 2017, 10:21 am

Hi I am Mr.?

I signed up for hackforums today and I wanted to share something with all of you guys. Some of you might know this tool and some dont. It is pretty incredible. I used it on my android phone and tablets.

You will be required to have any Gmail account.

Before you add the Gmail address make sure that the Gmail account you are using is not set to block third-party applications. Every Gmail account is set to do so my default. You have to go under the Gmail account security section by logging in online to change it.

The Email Bot/Bomber allows you to set timers too. You can set the start and stop time and the time in seconds between each EMail or Text message you are sending.

This is 100% real.

I will share you with the download link if you comment on here.

We have also started our public group chat on Kik today. Where we share cool shit and handle what we need to.

The app I sharing with you is for android phones and tablets. The download link will be shared with you immediately at:

Here is the KIK public chat group link:

kik. me/g/dwZz1JAJXBdRbZI83HjSKGFsN90

Or post on here.

BTW I was sending 30 Emails and Text messages per minute in 2 seconds intervals. Easy to u[b]se and it kicks ass.

Hello Everybody,

I had issues with login in with my previous credentials.

Install this tool to your android devices.

Connect to whatever Gmai address you are suing. Before you do that makes sure that the unknown apps are not being blocked by your GMail account. Go to security Gmail account settings and disable it.

Please contact "mojakonta" if you have any questions. Also, join us on Kik.

Keep replying to this thread and leave good reviews. This works 100%

@OP you have 0 reputation, so you risk nothing if you decide to go crazy and rat HF members.
I want to see a review from a reputable member, it seems fishy at this stage.
