Setting up botnets is not illegal. Using them for malicious purposes is

hansensmurf - June 25, 2017, 4:48 pm

This guy scammed me for 85\$... dont trust him.. (bought 1000 loads from him, never got any)

PokemonGoArena - June 26, 2017, 10:09 am

The piece of shit "coachhip" is SCAMMER stole my money and now making excuses. You are online all the time on skype and replied very fast before purchase and after purchase, you are not replying to me and scammed me with \$40

See reference here: <https://hackforums.net/showthread.php?tid=5652702>

This guy coachhip is a SCAMMER and don't buy anything from him. He will stole all the money and never reply you back. Before making the payment he will agree on anything and after making the payment he will not even reply you.
