Thread: [\[RAT\] What is the first step after add a slave](#)

orphen92 - June 13, 2017, 4:25 pm

Hello all.

PLease can you explain to me what is the first step after add a slave ?

Each time i add a slave, i lost it and i think its because of AV.

How can i kill av process?

Kareem - June 13, 2017, 5:38 pm

what rat are you using. P.S. this is the wrong section.

MOKA - June 13, 2017, 11:54 pm

If their AV detects it you will need to crypt your server, Also if you want to kill a AV process you can use process manager in your RAT

Zens - June 13, 2017, 11:56 pm

You need crypter and try to make your rat not suspicious. Goodluck

Note: there is a tool for kill av processes but i think it can not be used anymore. Av already patch it i guess.

orphen92 - June 14, 2017, 12:09 am

i used a crypter.

I have try a lots of rat. :(

I have try a lots of rat. :(

It mean the rat is not FUD anymore or the crypter has been "detected" by av. Try to build your own rat, you can make it like you want. And its free. Good luck
