Thread: [Azure ETH Mining method - Server mining for \\$43 per day](#)

Rhinemann - June 13, 2017, 7:32 pm

ROI Has now changed, make sure to do your calculations at an average of 35MH/z. The concept is still the same just a little longer payback.

So I'm not sure if I came up with this, probably not to be fair but I wrote it down myself to hand out here. With this little guide you can generate \$43 ETH per day with a total of \$131 per month from a \$100 investment. This method also has no limits, you could generate \$430 ETH per day if you have about azure subscriptions

My progress on a new pool with this method:

<https://ethermine.org/miners/666A93b39e0Ff9ed3f12c8fB3C6B7C12eC422e58>

I see a lot of people on HF blowing their methods out of proportion so I tried to keep this one as real as possible, using less than average results to base the method on. It's highly likely you will get better results than what was written. I even use this method!! Proof: <https://i.imgur.com/9LATJIW.gif>

I'd be grateful if you posted to keep the thread alive ?

Build the NV12 machine, it has 2x m60s. "CTRL+F graphics"

Code --Bizspark azure method by Naiked--

Before you begin you require a Microsoft Bizspark account, preferably an admin but an invite will work just the same.

With an admin account you get 5x accounts (Admin + 4 invites) which is what this tutorial will be based on, you can find sellers on most websites (Try MPGH / Bitcointalk) I will not be selling them so please don't ask.

Each machine will feature 2x M60 Tesla cards so let's do some math here:

1. Each miner has a fluctuating speed of 31-41MH/s so let's base our calculations on 35MH/z.
(<https://i.imgur.com/QS2wMsz.png>)
2. Based on CryptoCompare 35MH/z will generate \$8.75 per day
3. An admin account will allow you to run 5 machines which jumps this up to \$43.75 per day.
4. The machine costs £1,513.81 to run and you get £115 credit per month allows you to run the machine for 3-4 days.
5. Calling it 3 days you will be generating \$131.25 per month from those 5 machines

!!! The reason this tutorial works is because the accounts will refresh each month with £115 credit, meaning your next month will be \$131.25 pure profit or even higher depending on ETH price !!!

//All of this was based on ETH mining with a mid range outcome, results can definitely increase according to ETH price / pool luck\\

This method would work by far the best as no other cloud computing platform has a program like BizSpark. You could attempt to use the free trial credits on something like Google Cloud, but it wouldn't work well as GPUs aren't available for the trial. AWS wouldn't work well at all either.

It took a while before they finally upped my core limit, but it worked out. My Azure credit ran out after 59.3 hours of VM usage. ~57 hours of mining averaging 32 MH/s got me 0.042 ETH (~\$13). I paid \$50 for my BizSpark invite so I will be hitting ROI in 3-4 months, followed by 8 months of pure profit. Of course PoS will be implemented sooner or later, but I'm not too worried about that.

(Jun 25, 2017 12:30 AM)Naiked Wrote: [\[CITE\]](#) Huge revive, I get so much hate from people who say I'm going to kill the method. Bizspark is used by hundreds of thousands of people & mining is not against their TOS. Stop being salty kiddos.

Well to be fair, very few BizSpark subscriptions use the N series and I doubt that this method is going to last if a lot of miners are going to (ab)use it. Anyway, hating you for sharing it is immature, and I, for one, am thankful.

What reason? Do you know?
With free trial i receive 170euro or 200\$.

This is awesome man thanks!..

Quinn. - August 4, 2017, 12:54 pm

How much are the admin accounts? Average price?

?heshire - August 4, 2017, 1:20 pm

Posting here to do this later thanks man

Mizzy - August 4, 2017, 1:22 pm

Will check this out ;) thanks

Who selling invites? I want to buy.

Hacker - August 11, 2017, 7:10 am

Does this still work? i am guessing the ROI will be affected depending on ETH market value @ time of exchange.

Awesome tutorial man! I actually already have a BizSpark account through my work but didn't know what to do with the \$150/month lol.

Skull-13 - September 10, 2017, 9:50 pm

Nice share, OP. This is very interesting. \$43 ETH per day is great.

mobi35 - September 11, 2017, 3:38 am

Have anyone tried this ? I'd like to invest

KoinWarrior - September 11, 2017, 3:53 am

I get free \$148 worth of credit per month on Azure.

If I'm not wrong, to install 5 of them I have to set up 5 times?

Also, how can I access the VM without using ssh?

Edit : Connected through Putty

After pasting the commands, I get a confirmation message to continue, when I enter Y I get command not found

Any idea?

Thanks a lot

(Sep 11, 2017 01:17 PM)Naiked Wrote: [\[CITE\]](#) Why did you have to post to get the answer.. it's asking you to verify the install eg accept... type "y" or "n" lmao. You don't need to be babysat your entire life.

If you even read at all....

It gave me an error when I typed y

payment proof! honestly looks like a ponzi scam! yes it will make you money but at the end of the day someones losing!

divino2017 - October 6, 2017, 6:38 pm

thank you for this method sir, i can buy new BMW with this in less than a year. thank you very much.

gelsas - October 6, 2017, 6:55 pm

What is the best to mine now?

(Sep 12, 2017 07:19 AM)Naiked Wrote: [\[CITE\]](#) Maybe you should re-read the thread or actually google what ponzi scheme is. For one I'm not offering ANYTHING, this is simply a method to mine with widely available bizsparks accounts.

You want to try again bud?

nah bro bitcoin is a fraud its all a ponzi scheme and someone is gonna die ?

xayan123 - October 8, 2017, 8:36 am

Thank you so much for this! Unfortunately, CryptoCompare gives a very LOW ROI now.

AztecZ - October 9, 2017, 12:22 am

Nice method dude! Good for people looking to make some small \$\$
