Thread: [all tools this hacking tools should help u](#)

to55yanwar - June 14, 2017, 3:37 am

hello, today i will show some Tools for hacking
(this list put in 2017) ok let's start ?

Nmap (Network Mapper) | Free

Used to Scan Ports and Map Networks - and a whole bunch more!

Metasploit Penetration Testing Software | Free & Paid

Vulnerability Exploitation Tool ? The Metasploit Project is a hugely popular pentesting or hacking framework. If you are new to Metasploit think of it as a 'collection of hacking tools and frameworks' that can be used to execute various tasks.

John The Ripper | Free

Password Cracking Tool ?

John the Ripper (often you'll see abbreviated as 'JTR') wins the award for having the coolest name. John the Ripper, mostly just referred to as simply, 'John' is a popular password cracking pentesting tool that is most commonly used to perform dictionary attacks. John the Ripper takes text string samples.

Cain and Abel Hacking Tool | Free

Password Cracker/ Password Hacking

Cain and Abel (often simply abbreviated to Cain) is a hugely popular hacking tool and one that is very often mentioned online in a variety of 'hacking tutorials'. At its' heart, Cain and Abel is a password recovery tool for Microsoft Windows but it can be used off-label in a variety of uses, for example, white and black hat hackers use Cain to recover (i.e. 'crack') many types of passwords using methods such as network packet sniffing and by using the tool to crack password hashes. Cain, for example, when used to crack password hashes would use methods such as dictionary attacks, brute force, rainbow table attacks and cryptanalysis attacks.

OWASP Zed | Free

Web Vulnerability Scanner

The Zed Attack Proxy (ZAP) is now one of the most popular OWASP projects. The fact that you've reached this page means that you are likely already a relatively seasoned cybersecurity professional so it's highly likely that you are very familiar with OWASP, not least the OWASP Top Ten Threats listing which is considered as being the 'guide-book' of web application security.

ok i wrote all information i getting ? so godbay ?

(Jun 15, 2017 01:20 PM)Sheeple Wrote: [\[CITE\]](#) Well what you did is basically plagiarism, you didn't even cite your sources

what u mean ?

Sheeple - June 15, 2017, 2:58 pm

(Jun 15, 2017 02:50 PM)to55yanwar Wrote: [\[CITE\]](#) what u mean ?

Well what I mean is

What you did is basically plagiarism, you didn't even cite your sources. Not hard to figure out what I meant.

Gerymc - June 15, 2017, 2:58 pm

(Jun 15, 2017 02:50 PM)to55yanwar Wrote: [\[CITE\]](#) what u mean ?

You literally just copy and pasted something from another article and passed it off as your own.

to55yanwar - June 15, 2017, 3:02 pm

okay guys, I'm sorry I was wrong im very sorry

Sheeple - June 15, 2017, 3:27 pm

(Jun 15, 2017 03:02 PM)to55yanwar Wrote: [\[CITE\]](#) okay guys, I'm sorry I was wrong im very sorry

Well saying sorry won't stop the feds from breaking into your house for plagiarism

ZAP is java based so that is a Yes. JTR there is a Windows version so again yes, and Cain and Abel old but it was for Windows so yes.

If you want to get not really fancy but fancyish then install WSL and Kali.

BlackHatTopHat - February 4, 2019, 10:11 am
