How is this any different from using the brute function on WPScan or any other WP tool?

mehtevass - July 4, 2017, 3:50 pm
(Jul 4, 2017 03:27 PM)Capt. Murphy Wrote: [\[CITE\]](#) How is this any different from using the brute function on WPScan or any other WP tool?
this uses the wordpress admin panel and not the api (xmlrpc) what makes it harder to block ;)
