Good luck to everyone who is applying to this group. Lookin is a very nice and knowledgeable guy so this should go a long way!
I'm going to apply for this later today.

@Lookin, Please do me a huge favor and add the "are you ready - AC/DC" song in the OP. It's so much better then the current one ^^

Xeenon - June 14, 2017, 11:06 am

Crypto contributions are NOT what you have invested in. It does not matter if you invested a million dollars in XRP and you are now a billionaire. I don't care about your portfolio, rather, your knowledge and interest in cryptocurrencies. Crypto contributions = what you have done for the community.

Asuma's Application

Name:

Asuma

Time Zone:

EST

Skills:

Programming (Python, C#, PHP, Java, HTML/CSS), IT / System Administration, Google-fu, Can Cook Minute Rice in 58 Seconds

What can you bring to Consensus?::

Working on building a program to analyze cryptocurrency activity based around the CoinMarketCap API, it will assist in making trades, identify patterns, etc... I can be active. My entire life is spent with technology, particularly dealing with IT infrastructures at work, so I'm good at spotting crypto technologies that show potential in that sector. I have been known to make a joke on occasion.

How long have you been interested in Crypto Currencies?:

I was very interested in Bitcoin back in 2010-2012, but I somewhat fell out of the game so to speak. I have been following crypto again for the last couple months and have gotten extremely interested. I've started to invest in various currencies, and I'm spending an ungodly amount of time reading about currencies. I've even gotten my family to look into investing into crypto.

Previous Crypto Contributions:

The only contribution I've made so far is a tool to mine Sia using Marlin silently.

<https://hackforums.net/showthread.php?tid=5636510> and other than that, occasionally helping users when my expertise might be helpful (like building mining rigs, for example).

Previous & Current User Groups:

I sadly have none. I joined HF back in 2015, but then left for a while. I've been active these last few months however and I plan to stay active on HF for the foreseeable future.

Why should we accept you?:

For my ability to provide insight on technologies that people in IT might consider using, my ability to program, and my ability to cook minute rice in 58 seconds. I will be an active and productive member of the community.

Why do you want to join Consensus?:

I want to gain as much knowledge on crypto as a possibly can, and this would be a step towards that goal. I want to exchange opinions with other people who are knowledgeable on the subject, and debate the applicability of technologies with people who aren't simply trolls, delusional, or pumping. And also, the userbar is pretty sick.

Why do you want to join Consensus?: I can bring Activity, quality discussions and quality information that can benefit the group and the Crypto Currency board

Why do you want to join Consensus?: Consensus is based around a subject that I feel like I actually belong to. I mainly reside in the crypto currency board and it's a place I like to call home for me on Hack Forums. My guess is 99% of the people applying don't even know how the name of the group is related to crypto.

What can you bring to Consensus?: I can bring myself along with my enthusiasm and activity. As well as ideas and discussions on investing in certain altcoins.

How long have you been interested in Crypto Currencies?: I've been interested in bitcoins for a few years but only now have I started actually investing into crypto currencies

Previous Crypto Contributions: since I just started investing currently I have no contributions but I'm looking forward to helping people out in the future and being the one that people will come to when they have a question.

Previous & Current User Groups: Baka, Sheeppgang, Fusion, Echo, Anime Fan, The Old Skill, Valor, Terror, Respawn and a few other groups I can't remember

Why should we accept you?: Because I'm keen to learn and invest into cryptocurrencies. Not going to lie I made my first investment this week and plan to consistently invest once every week. I'm not rich but \$10 - \$50 a week will eventually add up IMO. Once I learn the ropes I will be glad to share information that I've learned along the way and help people in and out of the group.

Why do you want to join Consensus?: I feel like I said a lot of why I want to join above. I want to learn and the best way to learn is to be around people that know what they're doing. In 1 year I hope to have successfully profited via altcoins, and not just \$1000+ I want to go beyond. From what I can see cryptocurrency is the future so I'm taking people's advice and starting now.

How long have you been interested in Crypto Currencies?:

I have always used cryptocurrencies as a vehicle for payments here on Hack Forums. Only until this past year have I realized it's potential for long-term investments. I find it to be an unstable, yet promising form of currency which hopefully can take flight in the mainstream world. Moreover, the businesses which stem from the blockchain technology is astonishing and certainly prove to be a revolutionary phase of technological advancements in the commercial world.

Why should we accept you?: The skills previously mentioned set me apart from a majority of Hack Forums;

Respectful of other's opinions;

Avid cryptocurrency knowledge;

Eager to learn and share insightful information;

Relatively active with all else considered.

Why do you want to join Consensus?:

I often become tired of the Cryptocurrency section with all of the 'quasi-pump-n-dump' threads or the handfuls of people asking for magic orb predictions. I seek a higher quality cryptocurrency section for members to flourish with knowledge and who offer reasonable questions.

good Researcher for new Coins

What can you bring to Consensus?: When I invest I always do my own research on the coin I am investing. Yes of course I like to hear what other people say about a coin but I never base my opinion on theirs. This is what I believe my biggest contribution could be for Consensus. Also from my RL work I am highly experienced in project leading/working. I have no problems helping out on group related stuff.

How long have you been interested in Crypto Currencies?: Well I invested into BTC in late 2013 when BTC was at around 120-150\$ after a internet friend told me about it. He was just using it to buy but I loved the idea of the coin and wanted to invest in something new only a few people knew about. I am holding 2/3 of the coins I bought back than still. 2 and a half years back I started focusing more around cryptos after BTC going crazy. I invested into ETH as second and from there it really all took off. Now I am holding all kinds of different coins and trying to show friends and HF new coins I found I could see potential in. I am mostly experienced in long term investing. I don't really enjoy the gambling part about pump and dump even with research.

Previous Crypto Contributions: As stated before I love to hear what the crypto guys of HF think so I often post some kind of personal statement regarding coins and then ask for opinions.

<https://hackforums.net/showthread.php?tid=5615673>

This post was about my prediction about a general crypto downfall after the first big bubble when Ripple went crazy.

<https://hackforums.net/showthread.php?tid=5629781>

This post was regarding FTC or FeatherCoin an open discussion if people know this coin on here. Well the opinions on HF were pretty bad as you can see on the thread but I still chipped in a few dollars just for fun. Well the coin went crazy last week and I sold with quite some good profit.

Previous & Current User Groups:

As I was lurking the first few years on this forum I wasn't that active and not really in any of the old groups. Well that's changing currently.

Currently in: Dawn

Previously in: Skill, Fusion

Why should we accept you?: I believe I got a wide kit of skills which can be very useful and productive to this group. Also I am not applying for this group to launch or just wear a (btw nice) userbar. Crypto became a passion of mine and the people in this group share this passion and provide really awesome info. I mean the crypto news are amazing.

Why do you want to join Consensus?: This group just grabbed the attention of mine because it was the group I was always looking for. Most groups are simply not interesting for me because they focus on different things. I can only say it again and again I think the quality of users in the group so far is amazing and I could not wait for the recruitment to open since you revealed the group.

I am really hoping to get a chance to be on this group. Thanks for taking your time on reviewing all of these applications. I hope for the best.

I was younger and stupid back then and didn't know what I was doing nor did I acknowledge the potential of cryptos in general. I just thought it was cool that you owned your own funds without a company being involved.

Previous Crypto Contributions: <https://hackforums.net/showthread.php?tid=5643916> - I shared this because I thought it was interesting. It's public knowledge though. I'm a critical mind and can definitely think along on close to every subject being thrown in the group. You will find a pleasant and knowledgeable member of your group in me.

How long have you been interested in Crypto Currencies?: I've been interested in Cryptos for years if Bitcoin counts. I've been interested in altcoins since the start of this year and have started investing around April.

Previous Crypto Contributions: I'm not a huge fan of posting threads myself. People rely on other people's opinions heavily and I would not want to be responsible for hyping people up only to see them lose their investment. My contributions are well spread throughout the Crypto Currency section, and if you keep an eye out for my name, I'm sure you'll recognize them.

Previous & Current User Groups: None.

Why should we accept you?: I consider myself to be a decent member on Hack Forums. I put thought and reason into my posts and try to make sure I post no redundant content. I do not seek confrontation or attention and I make proper use of my ignore list. I am essentially active only to exchange knowledge and talk some banter with other friendly users. That mindset reflects well in discussions about Crypto Currencies, as I'm always up for a mature discussion on anything relating the topic and have no trouble patiently helping other people learn.

Why do you want to join Consensus?: Your requirements for joining would be one reason. I feel reassured that if I join Consensus, I will find myself surrounded by intelligent, motivated, and honest members, and that is much more important to me than being able to flaunt with some group title and userbar. That, and I trust both the owner and the leaders of this group to be great managers and fair people. Why should we accept you?: I want to learn more about alt coins and how to make profit off of them as well as gather better information to judge my investments off of. Private groups can be very beneficial to the collective when sharing thoughts and speculation.

Why do you want to join Consensus?: Same answer as above, really. I think it would be a nice opportunity to get some new insight from the members who are already knee deep in the crypto world.

Thanks for reading.

Sucks that join date actually matters when joining a specific group, but it is what it is I guess folks. I am a crypto enthusiast at it's highest standards. I will surely be applying later on in my hackforums career. Until that point, I wish the group and the members the best of luck.

How long have you been interested in Crypto Currencies?:

I've been interested in Crypto Currency since 2013/2014 when BTC was not that much of a thing but the main reason was my Country as PayPal isn't introduced here yet so I used to use different payment methods so thats where I started in to Crypto Currency. I still regret the time I had 7 - 11 btcs but I sold them as they were slightly increase just because of a small profit, fuck me..

Gunrox - June 18, 2017, 2:48 am

Name: Gunrox.

Time Zone: Greenwich Mean Time +1 (but I am going to be online all day every day this summer break).

Skills: I believe to be a very good entrepreneur when it comes to the marketplace related things, I am a very good researcher when it comes to investments and when providing advice I always have a link to support my claims or arguments. I am a good writer when I set my mind to it, but I don't

think that's necessary when coming to this group, it can be provided if needed.

What can you bring to Consensus?: I personally believe I can provide top-notch support within the group and within the cryptocurrency sub-sections. I am good in many aspects of cryptocurrencies as I have been following the market cap and reading articles on a day-to-day basis. I can provide suitable and interesting discussions, give great advice and views on investments and overall bring some spirit to the group, not that it lacks any of course.

How long have you been interested in Crypto Currencies?: Ever since Bitcoin showed up on 2009, I became curious about the digital currency and its underlying technology. At that time, it was very inexpensive and I thought that it was going nowhere. It was no until late 2014, that I have decided to go deep into Bitcoin by researching its blockchain technology and using the digital currency itself for everyday transactions. I did get into Bitcoin earlier due to fear, uncertainty, and doubt, but if I had, I would've become a millionaire by now. But still, it was better late than never and I decided to begin my journey into exploring and study blockchain ever since I have started on 2014. It was the amazing concept of the technology underlying Bitcoin that drove me into becoming a crypto enthusiast and following cryptocurrencies day in and day out.

I have also contributed to some quality responses in the Consensus help desk thread located in the mining & pools section. Spoiler ([Click to View](#)) - I am not trying to brag in any sort of way, so I'm sorry if that's the impression I give off.

Previous & Current User Groups: I haven't been in any user-groups previously.

Why should we accept you?: I believe you should accept me because I love investing and helping people with their problems. I believe to be active and trustworthy within the cryptocurrency section and that will certainly expand within my time on this website. Over the last three days, I have received a lot of messages asking for help on mining, storage, wallets and price speculations. I've always been willing to answer these question and provide the top quality support that people deserve.

Why do you want to join Consensus?: I am hoping to join your group to expand my knowledge with cryptocurrencies and stock markets (if anyone is interested in the topic) and help influence others to invest into coins that could have a huge impact on their financial life in the future and that could set them for life. I want to be able to meet new people and have good, interesting and funny discussions with them but on a serious level, if that makes sense. I would like to make a few friends and be able to have civilized arguments too. I would personally have made this application better but I'm currently using my phone, if you would prefer me to extend it a bit more, shoot me a message and I can arrange that.
