Thread: [I made \\$400 on Bustabit in 4 days from a \\$15 bankroll | HOW TO WIN BIG! + METHOD!](#)

Yes the title is a mock of Black Shadows.

Yes I actually have made \$400 recently from Bustabit.

No I have not put in more than \$15 and say that I did not.

This is the method:

Spoiler ([Click to View](#))BE LUCKY

Using this method, and choosing the right time to attack the "pattern" you see, you will be able to make even \$2000 in 20 hours from a \$50 bankroll.

Bustabit is not a website where you can find a pattern in a string of losses. It is not a game where you are able to "beat" the system and make thousands off of it. The people who "win" (or in better words, cash out before losing it all) are just lucky. I am lucky, Rikz got lucky, everyone got lucky who is positive net in bits.

No script will make you 100% profit. To show proof as to this, before I started with \$15, I deposited 500 bits as seen here:

You can see from this page: <https://www.bustabit.com/user/Ceej99?p=49>

THAT I LOSE MONEY USING A SCRIPT. It is that simple to see that I am not making money by believing that some "method" or "script" will be the key to riches through a gambling website.

EVEN THE WEBSITE SAYS THAT IT IS 99% LUCK

My advice, as someone who is profiting in Bustabit, is to not bet more than you can lose, and not to believe everyone's gambling claims.

This is directed at a certain individual on HF who has been on the forums scamming and downright lying to other users and nothing is being done about it. No warnings, no community alerts. Nothing.

I can vouch for OP.

I have spoken extensively with Compulsive today regarding the website Bustabit, and can attest that this is the method he has been utilizing. I had a lot of questions regarding the website as I had never visited it prior to speaking with Compulsive, but he made this method so easy to follow that even I could understand it after just a few minutes.

In all seriousness I hadn't looked into the site until today and Compulsive did explain a lot about it to me. But come people the website itself lists it as luck. Get rich quick schemes like gambling scripts are a quick way to lose your money.
