Thread: [Need Better Scan For My Telnet](#)

tellmyisp - June 15, 2017, 3:44 am

Im new to botnets/telnets so can someone give me a good way to scan because LRAB sucks

xbl_skid - June 15, 2017, 3:45 am

yah LRAB sucks

half the time it doesn't even scan

tellmyisp - June 15, 2017, 3:48 am

Write your' own. Or, if you can't, I'll write one and send you the source code so you can tear it apart / steal it / learn.

My BEST friend ZoneHax (You've definetly heard of him, he's basically God!) made an EXCELLENT Telnet bruter in C tutorial which you can find here

<https://www.youtube.com/watch?v=MPHeuWkYQ-w>

It's 100% not a copy and paste (Almost as if he was looking at the src on another screen and then typing it out) and this will get you at least one million bots within 3 hours or so.

I vouch he is a god i have seen it with my own eyes

mirai_isnt_dead - June 16, 2017, 9:12 pm

Vouch for zone he is a brilliant albeit young coder with amazing potential

Nipsu - June 17, 2017, 3:47 am

Have you tried asking your host for letting them to infect all of their servers?

LeakedDoxes - June 17, 2017, 4:16 am

if you want good bots just buy an echo loader or use wget.py and use that and buy an ssh list.

LRAB = Aids

Python Scanners = Aids

Lists = Good

LOL really ?

How the fuck do you think those lists are made ?

stupid kids these days lol

??
