Why do you want to join Harmony?: This is a group I've been wanting to see on HackForums for a long time.

Why should we accept you?: I believe I would be a good addition to Harmony as I can provide a lot of good music, t.v series & movies. I will also be active in the group and I am your Discord Manager.

I will also wear the group user bar at all times.

Preferred Genre(s):

I don't have a preferred genre so to speak, but I do prefer serialized shows where the long overarching plot is the focus, as opposed to episodic shows with a more subtle overarching plot. There are exceptions to this rule though.

Favorite Shows:Game of Thrones

Breaking Bad

Prison Break

Lost

How I Met Your Mother

BoJack Horseman

True Detective

Favorite Movies:The Man from Earth

Shutter Island

Wolf of Wall Street

Kung Fury

Trakt.tv link (if you use it):

I didn't know this site existed, but I might start using it.

Why do you want to join Harmony?:

I am a TV show addict. I have binge-watched more TV shows than I could possibly remember, and I am always looking for something to fill the void. I have found it very hard to find high-quality shows and movies that can live up to my high expectations, and to be in a community dedicated to such things would be fantastic. Plus, this gives me a good spot to discuss all of these shows and movies that I can't seem to stop watching!

Why should we accept you?:

You will be hard-pressed to find someone who has watched as many shows as me. If its considered to be a great TV series, there's a solid chance I've seen it. I am like, the definition of a TV enthusiast, which is funny because I never actually watch TV on TV (my Plex server uses a loooooooot of storage!)

Preferred Genre: psychedelic rock

Who is your favorite artist /producer / group / band?: This is going to sound extremely cliché and make me look like a Normie, but I love Pink Floyd. I'm not crazy into Dark Side of the Moon like everyone else is, but I enjoy the album "The Wall"

Why?: Roger Waters tells you a story in his album that he wrote mostly himself called "The Wall". It tells a complete story about his life and how everyone to him is always the same and they just put up a facade, hence the verse "all in all you're just another brick in the wall". It also talks about how his dad died in WW2 and such, and I just think that album is one of the greatest albums of all time. I love concept albums as well, which is what The Wall is.

How has music impacted your life: I can relate to it mostly. Roger tells a story through songs in his album and I listen. Roger was a lyrical and instrumental genius.

Provide 3 perfect examples of your genre: I'm not entirely sure what this question is asking haha. But if I had to guess, it seems like you're asking of some songs that fit my favorite genre. My favorite songs from The Wall are probably "On Thin Ice?", "Another Brick in the Wall pt.2", and "Pigs on the Wing". I also enjoy the song called "Shine on You Crazy Diamond" which is a Pink Floyd song but it's not on The Wall. The song "Echos" is pretty good too

Why do you want to join Harmony?: I was a part of Studio long long ago before it turned into AnimeFan and I loved Studio. I loved enjoying listening to and sampling other people's music and discussing their musical interests with them. I even tried to make some on that one PC program a while ago haha.

Why should we accept you?: I'm an active person within subforums. That's what I mostly post in actually. I love the part where everyone gets together and galvanizes over musical interests and it sparks many great conversations and I feel like I can be a great conversation starter

Thanks for reading my application. I hope you see that a good application doesn't mean a wall of text, but it's about what they put in it and I feel like I put a lot of good personal material in it that's all 100% true. I'm not here to try to kiss ass or anything. My application just gets straight to the point, and that's how they should be

Trakt.tv link (if you use it): Don't use it

Why do you want to join Harmony?: I watch tv/movies just about every chance I get. I've never had a place to thoroughly discuss what I'm watching, or going to watch and this seems like a great place for it! I also feel like I've seen every good T.V. show/movie in existence and need some recommendations, and also have a lot of shows/movies I can recommend.

Why should we accept you?: You should accept me because I watch a LOT of t.v., and when I say this I mean it. I've pulled all nighters before tests, and instead of studying I was finishing a show. I can contribute a lot to the group and will be extremely active in the sub forums if accepted.

Well thanks for reading my app!

Why do you want to join Harmony?: It seems like it's going to be a fun, chill group filled with people who share similar interests as I do, love for all different kinds of media. I'm always looking for new recommendations on things to watch/ listen to so being in a group like this will help me broaden my horizon with new shows, songs, etc. Also so I can help give recommendations to people who are looking to venture out, listen to or watch something that they haven't before.

Why should we accept you?: I'm a very chill and friendly member who has never had a problem with anyone on HF, I don't get involved in any drama so you won't have to worry about be starting

Anything else?: Will you guys be hosting movie/ show nights?

If there is a movie or show with no direction, I'll stop watching it but more often than not, I'll at least try to finish it in hopes that it will get better

Why should we accept you?: Because I'm active lurking HF while also being interactive with various HF members conversing in gud stuff :D I find that being in Harmony, I'll be a good fit in conversing.

Why do you want to join Harmony?: Because I'd love to discuss movies and shows with others. This would be useful to discover new movies and series that I otherwise might have never seen since I generally only watch movies that I've been recommended or that have direct ties to other movies that I loved (which at this point is more than enough to watch already, but the summer holidays are about to begin so that'll be two months full of movies etc).

Application

Music (Enthusiast/Musician) Application

Name: Victor

Location: Canada

Age: Old enough

Preferred Genre: EDM, Chillstep, Pop, Classical, Jazz

Who is your favorite artist /producer / group / band?:

It would definitely have to be Mozart or Chopin if classical musicians/composers are included.

Why?:

I am a piano player myself, and I really enjoy playing the sonatas and symphonies composed by Mozart. I have been playing piano for the past 10 and a half years, which illustrates how much I love music itself. Mozart's music would be considered as archetypal classical music. His pieces have really inspired modern composers and all kinds of music today.

How has music impacted your life:

As I've stated before, I've been playing piano for a little over 10 years now. This shows the dedication and passion I have for music itself. Other than classical music, I really enjoy clean melodies in EDM while I do everything. Music pushes me forward and gives me hope and power at dark times.

Provide 3 perfect examples of your genre:

Spoiler ([Click to View](#)) Nomyn - Quiet Moments

Why do you want to join Harmony?:

I want to join Harmony because of my passion for music and I would love to be around people that love music! That's my main reason why I want to join this group. Harmony seems like a great group that'll be full of music enthusiasts, which is great so we can communicate and recommend songs to each other! Simply, I want to be able to share my music taste and see what others offer from their music taste. I think it'll be a great opportunity to increase my knowledge in music even deeper and dig into other genres!

Why should we accept you?:

Well, I'm extremely active on this forum, especially in groups. I am an extremely talented pianist, and I am certified on the Royal Conservatory of Music. I also play band instruments such as the trumpet. I would love to be able to contribute and talk about music, graphics, and TV shows with others. These are all things I love with a passion! I'm looking forward to being in this group.

PS: Thanks for the dividers ScreemS

True Detective
Sherlock
Narcos
Breaking Bad

Favorite Movies:Gladiator
The Dark Knight
The Lion King
La vie d'Adele
Forrest Gump

Trakt.tv link (if you use it):
I made one specifically for this and pressed "Watched" on everything I had watched. It is very much lacking as I only spent about 40 minutes looking for movies and shows I've seen. I've watched a lot of movies and shows and I am pretty sure I only remember half of them.
<https://trakt.tv/users/tarjeik>

Why do you want to join Harmony?:
I was in the group "Studio" back in the days and judging from the [information thread](#) and the application formats, this seems like it is somewhat similar. I really liked the idea behind the group and it was great for a while, I feel like this can become even better.

Why should we accept you?:
I am a fanatic when it comes to movies and tv-shows. If the show I'm watching has a book series I can even decide to read the books too. (I read Game of Thrones after watching season 2, and I read The Magicians after finishing the first season)
I spend 60-95% of my waking hours in front of my computer and during that time I am almost always watching a movie or a show. This accumulates to quite a bit of shows and quite a bit of movies.

I hope you'll consider me even without any fancy dividers.
Thanks illuminoot

Fortunate - June 16, 2017, 12:14 am

Music (Enthusiast) Application

Name: Fortunate

Location: Finland GMT +2

Age: 20

Preferred Genre: Rap genres such as underground/shadow rap, gangsta rap. I also enjoy electronic and aesthetic genres.

Who is your favorite artist /producer / group / band?: Probably right now my favorite rapper group is \$uicideboy\$, favorite producer GREAF, favorite band Nirvana and my favorite artist must be Yung Lean or BONES.

Why?: I've always liked the rap genre. The lyrics of a rap song usually have a deeper meaning. Since I was first introduced to underground rap artists 2 years ago, I was emotionally hit. I was depressed and was losing hope back then. I can strongly say that underground rap containing meaninfull/sad/suicidal messages did really help me throughout the year.

How has music impacted your life: Since I was a kid music has always interested me and I've always had a good sense of rhythm. As I previously said that music has helped me through though times, as cliché as it sounds but it's very true. Once I plug in those headphones my body goes completely numb and I relax.

Music has been also a key to many friendships. I was very lonely a few years ago and since I started drumming I got many friends through music and got into a band. Music has had an all positive effect in my life.

Provide 3 perfect examples of your genre:

<https://www.youtube.com/watch?v=yUqWw5Vx42g> - \$UICIDEBOY\$ - NEW CHAINS, SAME SHACKLES

<https://www.youtube.com/watch?v=6Qp6Cf2J1nk> - Bones - WhereTheTreesMeetTheFreeway

Why do you want to join Harmony?: I really want to be in an active group that is music related. This is what HF has been missing and I really feel like the group is just perfect for me.

Why should we accept you?: I am active and I really meet the groups description. I provide activity and daily content. If the group is active -> I will be active. I am a really nice guy overall, I (think) I have a good sense of humor and a good taste of music when it comes to every genre. I will help every member daily with my skillset, which includes many things. Just ask me.

Who is your favorite artist /producer / group / band?: MF DOOM

Why?:

The dudes got the best story I have ever heard in hip hop.

Started with his brother in KDM. Both incredibly talented listen to What a Niggy Know he does the second verse and its a terrific fun ass feel. Now in 93 right after there group took off (multiple hits on mtv) he gets hit by a car and dies.

Zev x Love gets dropped from his label the day fn after. Then he goes to NY and becomes pretty much homeless freestyling out of Harlem clubs wearing panty hoes over his face. Reason, he knew they dropped him not because of talent but his image. His brother had the look he "needed for them".

Course music is music, it's imagery shown through sound not looks. Point being he evolved to MF DOOM wearing a metal mask seeking revenge against the industry that wronged him so. Which lead to the launch of Operation Doomsday his first solo album which is truly amazing. Especially considering he produced the beats and recorded it out of his room.

Keeping that in mind go check out Dead Bent and tell me that's not great.

How has music impacted your life: It's one of my only outlets for creative expression. I need it in my life.

Provide 3 perfect examples of your genre:

[The Fine Print](#) Has a nonstop sets of the best lines I have ever heard, know each one by heart with the meaning and trust me its all great. From riddles in of no bread, to miller time, metaphors for fakes in the industry, even referencing breaking drake's till they flak, to shutting dudes cakeholes really great.

[Hey Ya](#) Don't need to explain why this is such a brilliant song. To put that concept in such a beautiful and fun way was truly unique.

[Mathematics](#) Referencing gov's kid Ricky Ross makes this one get the list for me. Course everything in that song still holds relativity.

Who is your favorite artist /producer / group / band?: Favorite all time is Drake but favorite right now is probably Lil Uzi Vert. I've also been into a lot of other artist lately.

Other artists in my playlist and that I've been bumpin' lately.

1. Gucci Mane
2. Migos (Quavo and Offset mostly)
3. Lil Yachty
4. Playboi Carti
5. NAV

and a ton more.

Why?: Well Drake just keep putting out hit after hit and has really blown up since I heard him back in like 2009. Most of his music is just hype or feel good music which is what I love. Basically the same for the rest with the feel good or hype music.

How has music impacted your life: Whenever I get depressed or down I like to listen to a lot of hype

music. It really cheers me up most of the time and gets me in a good mood. I've used hip-hop and rap to get through a lot of tough times in my life. It also really helps when I'm grinding out mindless stuff in games. Always makes it go quicker.

What inspires you?:

The freedom that we have to travel around the World to the most beautiful and cultural places. The only thing that divides us from nature and monuments are the borders. I've been to many places so far, but every time when I visit a new country with different lifestyles, animals, nature, and economy it's a mind blow in my consciousness. The Great Pyramid(s) at Giza, the Whales on the coast of South Africa, the pile stones in China and the Surf Madness in Costa Rica. Even though this is not in common with Harmony's main focus of aspect, I think it's a good inspiration for General people and vibes.

With joining Harmony other graphic designers are also joining and thus creating a strong bond with them is mandatory. I hope to meet new people with Harmony, construct them, influence myself in becoming more valuable for HF as well and obtaining new information that I can use to acknowledge new things.

Why should we accept you?:

I am a friendly individual with an open-mind, in two ways, yes. 1. Delivering my own information and provides them to other members and users of Harmony (and HF). 2. Open to new ideas, thinking, and communication. With those two simple aspects, I can commune an advanced and complex individual.

Music (Enthusiast) Application

Name: Excavated

Location: Texas

Age: 18

Preferred Genre: Punk Rock/ Alternative/ Rap

Who is your favorite artist /producer / group / band?: Green Day

Why?: Been a huge part of my life. Whenever I go through hard times, I put in their music. Whether it's from 1991 or 2016. Went to a concert last March and it was one of the most amazing experiences I ever had. It's more than a simple performance, it's magical.

How has music impacted your life: Green Day has more specifically impacted me. However music in general got me to start playing instruments. I did 3 years of band in middle school playing the clarinet. I was in top band in 8th grade and in all three years got division 1 in the solo contests. I quit after 8th grade and been playing guitar ever since for over 4 years

Provide 3 perfect examples of your genre: Green Day (old version), Muse, Eminem

Why do you want to join Harmony?: This group seems wonderful for me. I love music and I get tired of seeing low activity in the HF Music Melody section. Would be amazing to talk to other people with the same passion for music as me. I could also learn more from others and maybe learn about GFX which would be great

Why should we accept you?: Because I do the things a music enthusiast would do. Listen, play, create. I am working on a music themed forum and would love to get ideas from others here for what they would like in one. If you need someone who is dedicated, I am your perfect member.

To be honest, the userbar is what grabbed my attention to the group, but after reading that it's a group about entertainment (of sorts) I figured it'd be perfect for me.

Why should we accept you?:

Going through my recent posts might not show too much as I tend to keep most of my posting inside of groups, as I find the communities inside of groups to be way more helpful and friendly than elsewhere.

I'm a big contributing poster inside of group sub-forums, and love to start discussions and be involved within groups.

Anything else?:

I chose to do general as I fit into more than just one of the other applications, I have the questions that haven't been answered in the spoilers below for those I could have chosen.

Music Enthusiast:

Spoiler [\(Click to View\)](#)

Preferred Genre: Rap

Who is your favorite artist /producer / group / band?: \$ki Mask The Slump God / XXXTentacion / K.A.A.N.

Way more than these, so I just listen the top few that I listen to every day.

Why?: I prefer rap because of the fast-paced beats, the deep lyrics that many rappers use, that many listeners can relate to.

I enjoy being able to practice rapping along to songs, as it puts me in a better mood whenever I'm feeling down.

There are so many different sub-genre's inside this very fast growing genre that you can never get bored of it.

How has music impacted your life: Music is always there to pick me up. I could always find something whenever I was feeling angry to calm me down, something for whenever I felt depressed to help keep my mind in the right place, something to hype me up before a big game or whenever I'm hanging out with friends.

Music has helped me get over break ups, set the mood when you're with someone special, and to be perfectly honest I don't know if I'd have made it though high school without music.

Provide 3 perfect examples of your genre:

This may be a little hard seeing as it's so broad, but I'll list a few favorites. (1 for each of my favorite sub-genre's I suppose, though I could go on for days with different types that I love). [Boogie - N*gga Needs](#)

[Brennan Savage - Bulletproof](#)

Juan The Young Chef Don - June 17, 2017, 10:07 am

Music (Enthusiast) Application

Name: Juan The Young Chef Don

Location: Canada

Age: 17

Preferred Genre: Rap, Pop

Who is your favorite artist /producer / group / band?: My favorite artist that I've been listening to right now is Mura Masa/Ed sheeran/some local rappers.

Why?: I tend to listen to not one specific genre. I bounce around a lot since I like almost any genre except a few. My mood lately has been listening to music with steel pans and just some local rap.

How has music impacted your life: It helped me get out of depression and anxiety. I've picked up Guitar and started learning. It's an outlet for when I go through hard times. I always have music playing 24/7.

Provide 3 perfect examples of your genre:There's not such thing as perfect examples. Music is different to everyone else. Some may think Chief Keef is what Rap should be some thing Tory Lanez. Within a Genre is more genres. It's so diverse it's hard to pick who's what. It caters to everyone differently.

Why do you want to join Harmony?: So I can open myself up to more music artist and explore it more. I've always wanted to explore other genres I'm not too familiarly with and this group would help me. As well as I could give input on genre other people might like to explore and that I'd be able to help them with.

Why should we accept you?: Like I stated I'd be able to happy to help people explore other genres that they'd like to explore. I'm very musically diverse so that would be great.

Why do you want to join Harmony?: I enjoy talking about films with people, and I was a cinema studies major for a year in college before changing majors. I know a lot about film, the industry, and current film/tv shows, and would love to talk about my interests with other people.

Why should we accept you?: I enjoy watching films and tv and I would love to talk about what I check out with others who are similarly interested.

Music (Enthusiast) Application

Preferred Genre: Hip hop/soul/funk/r&b/jazz

Who is your favorite artist /producer / group / band?: Impossible question to answer - I listen to new music every day and am always searching for new artists and songs to check out - my current list includes Kaytranada/Anderson Paak/Goldlink and more.

Why?: --

How has music impacted your life: I grew up listening to music all my life. My parents were always listening to jazz while I was a baby and I grew up with older brothers listening to early hip hop and rap. From that point on, I became a musician, and my love for playing and listening to music grew from there.

Provide 3 perfect examples of your genre: Not sure I understand the question.

Why do you want to join Harmony?: Music is a big part of my life. I work at a record label now - I think that just goes to show how entrenched I am in the industry. I love music, I love listening to music, I love talking about music, there isn't a better place to do so than on HF with other like minded individuals.

Why should we accept you?: For all of the above reasons, I think I'd fit in very nicely with other people who love music as much as I do. I am always ready to share what I have been listening to recently, and I always love hearing recommendations of what I should check out next.

This response is for all of the above writing.

As you can see I am heavily involved in the arts, academically and in my own private life. I think I would be a great fit for the group because my interests are varied, diverse, and I would qualify myself as an experienced veteran when it comes to Film/tv/music/photography.

I'll continue to update it shortly) Please ignore the statistics for most watched x, as those are incorrect.

Why do you want to join Harmony?: Honestly, I just love discussions on topics I love. I would have applied with the 'General' application, but then I realised how much of a sloth I am- when it comes to movies and TV shows. I'd love to find and engage with people of the same interests and discuss the latest films. I reckon it would be absolutely awesome to have a group of people who understand a show or movie to be able to throw around predictions or personal opinions.

HARDSTYL? - June 17, 2017, 5:10 pm

Music (Enthusiast) Application

Name: Hardstyle or Chris

Location: Miami, Florida

Age: 24

Preferred Genre: EDM: Hardstyle(ofcourse:P) Drum and Bass, Trap, Dubstep and chill/deep house.

Also rock and country. I pretty much like everything. Even sometimes the shitty rap music where you cant understand a word?

Who is your favorite artist /producer / group / band?: My favorite DJ for the longest time was the Hardstyle Legend Headhunterz. Now that he has stopped producing I would say DJ Coone. When it comes to Trap/Dubstep my favorites are Yellow Claw, Flosstradamus and Excision.

Why?: Hardstyle is the Emperor Genre of EDM in my opinion. Nothing really hits my neurotransmitters as hard as 150BPM.

Trap/Dubstep are more popular here in the states and are basically used as a substitute since the hard dance scene is not big in the states.

How has music impacted your life: EDM and Hardstyle have impacted EVERY aspect of my life. When I am at work and feeling a bit down, a euphoric melodic track with female vocals picks me right back up.

In addition, it has had an impact on my life physically. Nothing gets me more motivated and getting my ass running on that treadmill more than the one hundred and fifty beats per minute of a hardstyle track.

If you haven't tried listening to hardstyle in the gym you are seriously missing out. Fuck preworkout, listen to hardstyle.?

Provide 3 perfect examples of your genre: Coone is a good example of an all around Hardstyle God.

The Wastedpenguinz are the KINGS of melodic and euphoric hardstyle. Try to listen to one of their albums and not get goosebumps. Ill wait?

Go back a few years and listen to Headhunterz in his prime. He helped shape the hard dance scene that we have today. And for that I am forever grateful.

Why do you want to join Harmony?: As you might be able to tell, I have a passion for music. I have attended a lot of festivals. And nothing is better than spending time with people who appreciate the same passion for music that you do. I hope to experience those same events whilst being apart of this group.

Why should we accept you?: I think the leaders of Harmony should accept me for a number of reasons. But to keep it brief and concise the main reason above all is the undeniable fact that I hold a fiery passion for music.

Music (Enthusiast) Application

Name: Tree of Life/Dylan

Preferred Genre: Dubstep, Chillstep, Future Bass, Psytrance, Hardstyle, House and more.

Who is your favorite artist /producer / group / band?: I do not have one favourite, but I have many that I love. - JAUZ, Kayzo, Joel Fletcher, Veni Vidi Vici, Will Sparks, Excision, Flux Pavillion, Zeds Dead, FuntCase, Virtual Riot, Zomboy and more.

Why?: I love these artists as they produce some of my favourite music. You should see me at a club when the base drops, man, I go fucking wild. Some of the best moments of my life have been dancing to this sick music.

How has music impacted your life: I listen to music on a daily basis. Listening to music really helps me when I'm upset. When I'm happy, it makes me ten times happier.

Why do you want to join Harmony?: I'd love to join Harmony as it seems like a really unique group to be a part of. I want to talk to new people with similar interests, and also branch out and find something new.

Why should we accept you?: You should accept me as I am kind, easy to talk to, have a great sense of humour and absolutely love music! I am an active member. Not only do I thoroughly enjoy listening to music, I am interested in movies and photography. I am eager to engage in discussion about anything.

Thank you :)

illuminati would you mind updating the thread when all members have been accepted (for now)? Also, Darkwin, your music videos are actually pretty dope for some of them. I like it.

SIM-3468354 - June 17, 2017, 10:41 pm

Music (Enthusiast) Application

Name: Wild Yak

Location: Australia

Age: 20+

Preferred Genre: Don't have just one. Love most House genres, most Techno genres, Hip-Hop, Metal. The list goes on, but I guess my library is primarily house/techno music.

Who is your favorite artist /producer / group / band?: It's hard to pick favourites when you can appreciate nearly all music. So I guess for this reason I'll say Gorillaz as a favourite 'band' because their music is so genre bending and unique. Also might have to say Kid Cudi is my favourite artist because his albums are definitely about him recording what he wants to do, not what he thinks is cool. There's too many producers I enjoy to pick a favourite.

Why?: As I kind of detailed about the artists above, their sound engineering, lyrical content, flow, and constant genre bending is incredible. They music they want to do, and they do it well. In the end it's about the love of the music, and I can get around any artist who generally shows an interest in their craft instead of just pumping out something to bring them in a quick dollar.

How has music impacted your life: I've listened to music every day for as long as I can remember. I wake up to, I fall asleep to it, and I listen to it throughout the day. There's always a song that describes a mood or even sets the scene when you're friends. I've been hanging out with friends just chilling and then all of a sudden an old song came on and instantly we were reminded of a few years back and it was just smiles all round. If your sad, angry, happy, horny, whatever it is you're feeling, there's always some kind of music to capture that.

Provide 3 perfect examples of your genre: This is pretty hard to do in my circumstance, and btw I feel as a 'music enthusiast' group this question should be more open too. What music enthusiast just has one genre?

<https://www.youtube.com/watch?v=WWuDiwr30SI>

<https://www.youtube.com/watch?v=KkBde6fHiWQ>

https://www.youtube.com/watch?v=kHcvGC_3LMA

Why do you want to join Harmony?: I think a group for discussing media would be a pretty great group. Lots of potential topics for discussion and lots of different views and opinions should promote some healthy conversation and be rather active.

Why should we accept you?: As much as music enthusiast was the best fit for me to apply for, I'm also starting production and have a love for Graphic design, Film and Photography too. I'm an active user and would love a place to discuss these topics in an environment more active than the HF forums for said topics. Multimedia has been my life for a long time now, so I think I can contribute a

lot within the group.

Who is your favorite artist /producer / group / band?:

Frank Ocean

Why?: In my eyes he's a perfectionist. He usually puts out a project and then goes on an extreme hiatus. He's made it clear that he can't produce quality sound if he's not in the right state of mind outside of the studio. It just makes me feel that his craft is important to him, and not solely a source of income. That's not something you could say about every artist.

How has music impacted your life: Fun fact: music is one of the biggest emotional influencers. Therefore, the statement "music is just music" is false. My teenage years were rough; growing up poor in Manhattan wasn't exactly a good experience for a young kid. When you come from nothing, it's great to hear about others who were once in your shoes, rise to something greater. Have you read about The Weeknd? [Read this](#) short biography if you will. Why do you want to join Harmony?: Although this is Hackforums, I'm not that interested in pursuing any skills with computers. Now when it comes to music, my ears welcome almost anything. For once, here's a group that's up my alley.

Why should we accept you?: I browse the forum everyday religiously, so you'd never have to worry about my activity. I've also been through what most haven't, so I would be a good crutch for any emotional support needed within the sub-forum.

Preferred Genre: Metal

Who is your favorite artist /producer / group / band?: The Project Hate MCMXCIX

Why?: The mastermind behind the music puts all his energy into making the best music he can, and he really does deliver. He's always looking to improve his music since starting the project almost 20 years ago. The band's music also has the most polished sound I've ever heard, with a perfect balance of hard and soft dynamics. Not to mention the depth of each track is insane. To top it off, the band went independent in 2012 and now crowd funds to get these mammoth albums recorded and released. The music is made for the fans, not for monetary gains.

How has music impacted your life: It has drained my wallet of hundreds of dollars, although I do have a nice CD collection to show because of that. I've grown up with music ever since I was a young child. I played in my school's orchestra when I was at school, and my dad taught me how to play the piano. I've made a few friends through music and we plan to collaborate sometime in the future and make some music. Music is one of those things that keeps me going everyday, and the excitement of discovering a new band can be one of the highlights of my day.

Provide 3 perfect examples of your genre:

Spoiler ([Click to View](#))

Why do you want to join Harmony?: I want to discuss music with other members of HF. I'd been wondering for the past few weeks if there was ever going to be a music group on HF, and then I found this. I'd also like to share music I've created with others and get feedback on how to improve.

Why should we accept you?: I love discussing music with people, sharing unknown bands with people. I'm currently admin in a large discord server (300+ members) to discuss mostly metal, but also other kinds of music. I also make my own music and am willing to criticise what other's have made. I guess in a way this is also a Music (Artist) application.

Who is your favorite artist /producer / group / band?: Can't really have one, but I'd have to say Bathory right now.

Why?: They were the first band (aside from Dissection) that introduced me to the black metal genre, which in my opinion, is the truest form of musical experimentation & deviation from conventional music.

How has music impacted your life:

More than I ever thought it would, my first ever album was given to me by my father, Metallica's

self-titled ('black') album. Ever since I listened to that at the age of 11, I couldn't keep myself from exploring the genre and eventually branching out into other styles of music.

After listening to mainstream bands like Iron Maiden, Slayer and Slipknot; I felt like getting a firmer grasp on music. After researching lyricism from popular bands, I decided to delve deeper into different genres and came across a plethora of unique bands.

Music has also encouraged me to travel a lot more, I can't remember how many festivals and concerts I've been to in the past year alone. ?

[Under The Sign of The Black Mark](#) - [Bathory](#)

Why do you want to join Harmony?: I'd love to find some other music lovers/enthusiasts that appreciate the malleability of music.

Why should we accept you?: I should be accepted into harmony as I'm a respectful member that will happily discuss & debate music, artists and contribute to the sub-forum. Be it with music recommendations to reviews of material set forth by other group members.

Why do you want to join Harmony?:

Here's a note, the two previous questions are the vaguest questions ever put onto a application form. I watch more movies in a week than most do in months. So picking a favorite movie is like asking me what my favorite kind of fruit is. The answer to that is, I don't fucking know, I eat them

everyday in different varieties. I love groups with specific film sections. I was in Studio, and even planned on making a filmography and television section in The Order back when I was leader, but never got around to it. I still plan on enrolling at Full Sail to get a bachelors once I finish my major. It would be nice to once again be in a group with a film section. I also have minor experience in screenwriting, as I've written a few screenplays in my spare time and Taylor Sheridan is a family friend.

Why should we accept you?:

As I said, I watch more movies in a week than most do in a month. For example, just today I've watched Predator, Free State of Jones, Snatch, and I'm just now about to start Michael Clayton. In the time between spring and fall, I have neither school nor work. So days without plans basically consist of me sitting at my desk with a movie/show playing on one monitor, and misc browsing on the second monitor. Odds are, if you list off something, it's likely I've seen it at least once, if not multiple times. In the coming weeks with GoT returning, I plan to re-watch a season every day or two, in preparation. I've also reread the first book in the last few months, which isn't really relevant to a film section application but just thought I would put that out there.

Preferred Genre: All of them, though, the majority of my knowledge resides in the hip hop genre.

Who is your favorite artist /producer / group / band?:

Producer(s):

Dre, Esco, Metro, Mike Will, Russ, felly, and pretty much anyone that creates their own wave of music.

Artist(s):

chance, childish, felly, russ, kid cudi, frank ocean, tyler the creator (any1 in ofwgkta), vince staples, takeoff, offset, cousin stizz, kendrick, wayne, jay z, king gizzard, skizzy mars, smino, B.I.G., big

sean, asap rocky/ferg/ant, wiz/berner, the list could go on. My main playlist has over 3k songs that I started in 2012.

Why?:

I enjoy the mainstream music just as much as the next guy, but my favorite artists are the ones who create music as a work of art. a song that can be deciphered in so many different ways depending on how the person listening to it perceives its lyrics is incredible to me. the artists i listen to are categorized by the mood that I'm in at that moment.

How has music impacted your life:

in so many different ways than i can count. outside of hf, i'm the "music guy". i've played a couple instruments here and there just to get a basic understanding of it, but I would much rather listen lmao. driving around for hours when i'm stressed out listening deeply into songs lyrics has influenced my outlook on life and helped create who i am today. it sounds cheesy and cliché, but it's true. if i was offered 1 million dollars cash money right now to never listen to music again in my life, i would turn it down in a heart beat. this world would suck even more than it already does without music. music is imagination.

I spend a lot of my time on Hackforums once I am home, and to have a community to talk to is something I'd be glad to have once again.

Anything else?: I'm an avid Series watcher, and in July, Game of Thrones new season is going so start, and I need a group of people to share my opinion about it once its here! Also I'm an avid graphics artist and that might fit into Harmony's genre!

Why do you want to join Harmony?: Well, to begin with your userbar is beautiful so that's a big plus. Second of all, you seem like a group where I'd have a great time. I see you're a bunch who like music and TV shows; well I do too. I didn't choose a specific application preset because I couldn't choose between both. I mostly listen to hip hop/R&B these days,

such as Kendrick Lamar, J cole, Childish Gambino, Tyler the creator, Big Sean, Logic, Future, Gorillaz... I used to listen to a lot of alternative rock though, such as Arctic Monkeys, Red Hot Chili Peppers, Nirvana and Foo Fighters. I appreciate understanding the meaning behind the music I listen too and I usually investigate a lot of the music and artists I listen too and I enjoy discussing them. When it comes to TV shows, I've watched Breaking bad 2x, Daredevil, Dr. House, Lost, Sleepy hollow, Arrow (stopped), The Flash (stopped), The 100, Futurama, Game of Thrones (starting 2nd time), Rick and Morty x4, Jessica Jones and some more I don't remember.

Why should we accept you?: I think we have matching personal tastes when it comes to having fun occasionally and that's how I usually connect with people, so it makes all the sense to join a group like you, in my opinion.

What inspires you?: I gain inspiration from many different things, It could be something I've seen on TV or something I've seen whilst out walking. I love looking at other people's work and see how they think by what they create. I must admit, a lot of my inspiration comes from coffee, lot's of coffee lol.

Why do you want to join Harmony?: Joining Harmony would be a great thing for me. Not only am I very active in the graphics section but I am active in a lot of other graphics forums, websites and other online communities such as Dribbble. Being a part of such a group will lead on to learn from others and hopefully inspire the rest.

Why should we accept you?: I am a very creative, energetic and productive person who loves a challenge and

understanding how things work. I have also been building up my own freelance graphic design business and I have been involved in design for over 6yrs. Within that time I have worked for many companies worldwide and gained a vast amount of experience. My main field of interest is logo design and branding although I am also fluent in all other aspects of graphic design.

Kindest Regards

What inspires you?: Sounds cheesy, but the world around me. Simple everyday things that you never really notice until you really look at it. Things ranging from a simple water bottle (i.e why is the bottle designed like this versus a different brand's water bottle) or something a bit more complex like a brand's logo or another artist's work. How did they make this, why did this make this, and how does it represent their "why was it made?"

What programs do you have/use?: Adobe After Effects, Illustrator, and Photoshop. Although I primarily use Photoshop.

Why do you want to join Harmony?: It's been awhile since I've really participated in a user group. I am currently in Torque but the main reason behind that was because I did the signatures for them and even then, it's not exactly my "scene." (Don't get me wrong I love the group and all but it's really hard to participate when I don't understand what's going on, haha.) I want to join Harmony because I want to collaborate with people who are also into the arts and media. I don't only participate in graphics design either, although it is my preferred media. I do understand music (I play trumpet and piano and know a bit about singing, etc from being in band). So an overall multimedia group is a fantastic group for me to join and really be able to participate fully. The only other group that I was a part of that really focused on media was GraphicMasters and I see Harmony as the newest version of GraphicMasters (to some extent). I'd also like to possibly see if the graphics sector, as a whole, can make some contributions to the graphics forum like other groups used to (i.e make a giant tutorial/resource pack/collab together. Host contest/etc and give prizes, etc.)

Why should we accept you?: I have a great amount of experience with graphics as well as other media. I am also very easy-going and don't start up trouble. I am honest and determined to make the graphics section a better place again where people can be inspired and post graphics and get real criticism to better their works and it'll be the section it used to be years ago when people were actually interested in receiving and giving actual criticism, not just saying silly comments such as "10/10 I like it!" What better way of achieving something like this than with a group of dedicated artists who would surely benefit from such contributions.

size=large]Music (Enthusiast) Application[/size]

Name: Zeon

Location: United Kingdom

Age: 20

Preferred Genre: New Wave

Who is your favorite artist /producer / group / band?: Joy Division

Why?: I believe them to be a very overrated band to this day. Their musical style is unlike any other band I have heard, and Curtis is awesome on the vocals. The lyrical complexity of their songs overshadows most bands of the time and today.

How has music impacted your life: It has allowed me to meet people who enjoy similar musical tastes and form friendships with them. Whenever I am in a bad mood, music is sure to change that. Provide 3 perfect examples of your genre: Joy Division, OMD, New Order
Why do you want to join Harmony?: Although the spectrum of discussion for the group is quite broad, I feel as if there is no other group currently on HF which encompasses any of these topics.
Why should we accept you?: I've been around since '09 and have actively contributed to HF since then.

Music (Artist) Application

Name: Raddify/Mark

Location: Midwest

Age: 15

Preferred genre: (1) Lofi-Hiphop/Trip-hop (However as an enthusiast it is lofi-hiphop/hiphop/indie rock/pop)

Examples of your work: <https://soundcloud.com/confusingly> (pref check out they call me thumper, my first attempt at music using pogo as an influence)

How long have you been making music?: Well, this is an odd journey because I used to want to make it, so I pirated FL Studio, and fucked around but never actually made anything, and then this summer I decided I would actually start on it. So I suppose, I have seriously been making music for like a month.

Who and/or what inspires you?: Pogo, ODESZA, Shawn Wasabi (working on recreating something like his stuff) Idealism and finally Baths. That's the who, the what is to learn how to express how I feel in a state of time, so like for example They call me thumper is more upbeat (except there was a lot I learned from that, definitely can do better now) and in my track 'you know i cant' its more sad.

Write one paragraph about you or your work. Go ahead sell yourself: I really enjoy making music, and incorporating how I feel in it. To be honest one of the best things is probably finding THE audio track(s) you want to put on a song and just hearing the same sort of beat for hours on end. It is just really relaxing. It is stress free and soooo fun to do. I love it. My work represents how I feel like I said earlier. I also am actively working on new music, and trying to become better (because if you do listen to my tracks they are definitely not the best in the genre, so the goal is to push myself to my best). I enjoy talking to other producers and learning from them. Hopefully I can meet other creative people if I do get into this group, I also like photography and graphics, so maybe I could learn more about those if I get in the group.

Have a good day :)

Why do you want to join Harmony?: I'd like to be in a community that has similar genre interests to me, and would especially like to be part of a community where discussions about shows and movies exists, particularly those about Game of Thrones. I have been on Hackforums for 4 years now and would finally like to be in a group with people I feel comfortable with, and a community that would motivate me to stay active on HF. I hope Harmony is that group.

Why should we accept you?: When I'm not studying or out of the house, most of my time i spend on my PC is spent watching Movies and TV shows. I've seen many good movies and plenty of bad ones. I would do well in staying active within the group, and would love to share my thoughts and opinions on shows/movies that I have seen. During my 4 years on this site I've always tried to stay HQ and have never got any warnings and have gained a good reputation in the Currency Exchange section.
