I really seem to like this version more than the original one.

Thoughts?

I love the original. This sounds nothing like it, but I love this too.

I feel this would go great in a Ghibli movie! Definitely a different take on the song and is awesome in the right context but not as impactful by itself.

This is a lot better than the original, keeping in mind I did not like the original.

A very pleasant video, I haven't watched the original in a while so I'd have to go back but this was very mellow compared to what I remember in the original.
