Thread: [Previous username search](#)

Pronouncer - June 15, 2017, 6:42 pm

Just an idea (based off a personal vendetta of mine)

Having a section where you could search previous username and see who it belonged to in the last 6 months would be useful.

Reason I want this: as I said, personal vendetta, I want someone closed, they've been scamming off-site, threatening and doxing Hf members (incl me which idc about), oh and he has partaken in buying and selling HF accounts to scam on (recently he bought a 2013 Uber account and scammed on it) , so I'd like to trace him back to his older username to make a report on him exposing all his multis with proof etc.

I feel like this feature would combat a lot of multi accounter

There's a feature called Username History which is Ub3r only

I know that, I could get a friend to check that... But what I'm after is to find out the current username.

(I know his old user name)

Then I wanna track it back as well

Threats are a no no, buying HF accounts to scam is a no no too

If you search in the username history, say you search one of my old names "Phillip Ronan Gallagher" it shows up as my current username "Fresh".

Not sure if that's exactly what you mean

Yeah that's Uber only... Can I get you to do a search then I'll close this thread?

I'm not sure if it's allowed, I heard that Ub3rs can't Trust Scan for Leet members, not sure if it applies here.
