Thread: [A REAL MONEY MAKING \\$70-80 A DAY IN BTC. NO BULLSHIT](#)

*luxity - June 16, 2017, 12:21 am*

Many of you will click away because of this total shit thread design. That's fine.

Go check out one of those clickbait methods in the Ebook Bazaar that promises \$1000/day. I'm sure it will work out for you.

— The Blackhat —  
Bitcoin Banker

I'm just gunna cut to the chase here. I don't wanna make one of those classic get-rich quick sales threads with the flashy thread design and the all-caps title.

Instead, I want to be real with you guys. I've devised a method of making a modest amount of money, about \$70-80 a day in Bitcoin completely autopilot.

Before going any further, I'm going to show you what my daily actual earnings look like.

These pictures are old because I have stopped dabbling in black hat things. Please feel free to have a look at my vouch reviews below.

If you're still skeptical, trust me: I get it. This isn't my first rodeo with ebooks either. I've bought one or two which turned out to be completely useless.

However, I hope that I've proven that this one is different. Yeah, I know all ebooks say that, but I'm trying to be honest with you guys. I've found a way of earning stable, scalable Bitcoin income and I really do want to share it with the awesome community that is HF!

How to purchase

The price is \$34.95, non-negotiable.

I accept:  
Bitcoin  
Amazon Gift Cards

Is it a large investment? No. And after getting the system started, within 3-4 days you will be pulling in \$40/day no problem, and the earnings only go up from there. Frankly, I feel like this is a no-brainer investment. Perhaps I'm even setting the price too low.

Here's what you get with your purchase:

1-on-1 PM and Skype support, if you're having trouble getting set up

The method itself, in a beautifully crafted PDF file

Any and all updates to the method

The website template that comes with this method. Artistically crafted HTML5 by yours truly

Please remember before you buy that this method is blackhat. If you are uncomfortable with that, no problem. I completely understand. You don't have to get the ebook. However, keep in mind there is no risk of getting in trouble because you will be masked behind an anonymous BTC address.

## VOUCH COPIES 2/2

Grammar 9/10:

Grammar was pretty spot on and was easy to read and skim through it. Didn't have any issues with reading the eBook and was able to read it with ease

Method 8/10:

Now, this method is only getting an 8/10 because you need dedication to do this. Not only that, but you'd also need some sort of experience with following this method. The experience doesn't need to be advanced or tech savvy at all, but the way he shows the method is an "easier" way that anyone can do, but if you want the BEST results, you'd have to use your head a bit. It's hard to explain without ruining anything from the eBook, but in my opinion, I actually might give this a go

Worth it?

In my opinion, the price actually isn't bad for this eBook. I think it should be a bit lower, but if you dedicate yourself to this, you could potentially get this to work, and hit the winning jackpot with that one lucky "hit" lol. And no, this has nothing to do with gambling.

\*Method; never heard about it, but I truly believe It's clever. I don't usually review ebooks, but I can tell you that this can actually work, if you put work into it. When you're earning money, work feels like nothing.

Conclusion: For 35\$, this method being unique, I tell you, It's WORTH IT. Do it, you won't regret it at all.

You accidently left in "Thread options" in the title. Not a big deal but wanted to let you know.

Second image shows it was uploaded - April 4th. Also the image of the blockchain wallet shows 1 BTC - \$899.89 When the current price for 1 BTC is like \$2.4k.

Something seems fishy?

//EDIT - I'd suggest on changing the payment proofs for much more recent to get potential customers. Not sales trashing but GL WS.

If proof is added you must show "Value when it was received" !

Not sales trashing or anything just want to make sure.

To reassure potential customers id agree with @kookur and post the images with the payments showing Value when received.

I didn't think Blackhat methods were allowed? Either way this looks like a pretty decent method if it really is completely auto-pilot. Is there any way this can get saturated?

You ever posted these proof pics to some other forums because when opening the image on imgur it shows 1400+ views!

Looks kinda interesting but without any recent proof of earnings, there's no reason to take a chance on something so skeptical. But that's purely just my personal opinion.

Might buy once I see vouches and such, GLWS!

Arghh the reverse psychology is killing me.

To be honest, first thread I've seen selling a method that SEEMS reasonable.  
But who knows.. might be another quick buck for you.

Yeah you can make \$70, but what are you investing in it?

Not trashing your sales at all, just giving my opinion on it.

Edit: As stated before by some other members, we'd like to see some up to date proof, anyone can receive a few bucks on their BTC wallet.

Please convince me, genuinely interested.

No problem, how it works is the more you invest, the more you can make, you dont need to invest at all if you dont want to, and you can still make money, it just may take a bit longer to reach your desired amounts
