Thread: [how to download all zip files form this website](#)

mralihaidar - June 16, 2017, 12:52 pm

hello, can you help me with this.

i want to download all .zip files from this website:

Code all-free-download(dot)comi use linux mint

Try [this](#). This was done for .pdf files but should apply to other formats as well.

I don't know if this can be helpful or not in your case, because, you said that you work on Linux

but, anyway if you choose to work with a batch file on windows, you can take a look at this ==> [How to extract data from website ?](#)

try via FTP server

open a session and use mget for massive file downloading. (correct me if am wrong)

Try curl, but this wont be easy since you dont have direct .zip links
