Thread: [Best Skype Mass Messenger?](#)

funtela - June 16, 2017, 7:01 pm

I'm trying to use Clownfish but it keeps making Skype crash after about 5-10 messages.

Skype4COM no longer supports sending messages, however i made a fix which is kinda annoying but gets the job done. I sell a tool which is quite popular, but i might be able to hook you up with just a mass message tool for free. I will warn you though, it works kinda differently from the other tools & takes slightly longer, but its one of the only few ways left to do it on the latest versions.
