Question one: what do you think about BAT and that red dive down in the past couple hours. Will it go back up? I read the roadmap and people aren't very pleased. I didn't sell just below the support and it started to dip. Kinda fucked up.

Kill Joy - June 16, 2017, 7:30 pm

(Jun 16, 2017 07:21 PM)otto1 Wrote: [\[CITE\]](#) Question one: what do you think about BAT and that red dive down in the past couple hours. Will it go back up? I read the roadmap and people aren't very pleased. I didn't sell just below the support and it started to dip. Kinda fucked up.

I hold about 24,000 BAT, but I will give an honest unbiased opinion. I am a bit disappointed in the roadmap they released too. I was expecting more development-wise. I feel like it seems rather broad, but with a team that is already known for success, I think they have an idea that is a solution to a problem. I read that they have over 150 websites already on board to integrate with this project. Shapeshift just added them to their exchange today. It'll be interesting to see how this plays out. I think right now most people in it are for quick buck. Once the wheels really start turning and more things are developed, more people will go to Brave to earn money via advertising. Not 100% confident in this project, so I feel like my investment is more a gamble than say me putting it into Ethereum.

Yeah I fully agree. I still have a little more confidence knowing how determined and successful their dev team is. Like you said - it just needs to get the wheels turning. I was in it for short but I think it might turn into a long term hold. Who knows though.

boost - June 16, 2017, 7:46 pm

What are your thoughts on Waves? Do you think it has potential to reach a \$1 billion+ marketcap?

Kill Joy - June 16, 2017, 7:48 pm

(Jun 16, 2017 07:46 PM)boo5t Wrote: [\[CITE\]](#) What are your thoughts on Waves? Do you think it has potential to reach a \$1 billion+ marketcap?

Waves' marketcap peaked just below \$700 million a few days ago. I think that given some more time and more development work, it could hit \$1 billion by December.

Replace-by-fee is when the fee was too low when the transaction was sent and it was edited to include a higher fee. You should receive the bitcoins if the new fee was sufficient. They should not suspend your wallet over this.

BudiPonosan - June 16, 2017, 8:37 pm

for example lets say i bought XVG on bitter at certain price, and a day later i buy XVG again at a different price. When i put a sell order, which one is being sold, first one bought or last one?

SIM-3336514 - June 16, 2017, 8:39 pm

Does it really make a difference? You still average the same price purchased using the

average-cost method rather than FIFO or LIFO.

Laski - June 16, 2017, 9:06 pm

What are your opinions of the rumors of Golem (GNT) possibly being added to coinbase along with several other altcoins? Think it's a realistic possibility?

Kill Joy - June 16, 2017, 9:25 pm

(Jun 16, 2017 09:06 PM)Laski Wrote: [\[CITE\]](#) What are your opinions of the rumors of Golem (GNT) possibly being added to coinbase along with several other altcoins? Think it's a realistic possibility? Rumors are rumors and know one will know what will be added, if anything at all. There were rumors that Zcash, Dash, or Monero were going to be added but that has never happened.

POLY MATH - June 16, 2017, 9:36 pm

I'm going to make a bold claim.

Zcash and Monero will most likely never be added to Coinbase. For one reason only, most of the transaction volume for these coins avoid Identity Verifications and other "checklists".

I believe a coin must have:

PUBLIC Reputation(known)-with few screw ups

Marginal Pricing-Price must be a certain amount at minimum to ensure CB fees are decent(profitable)

Transaction Volume- basically, by adding the coin to CB. A good percentage of the coin transactions should switch to CB.

-This is not my area of expertise and this is just an opinion.

I also second to this 100%.

rouxster115 - June 17, 2017, 6:28 am

When ETH doesn't become mineable, what currency will you think is best to mine?

Kill Joy - June 17, 2017, 6:31 am

(Jun 17, 2017 06:28 AM)rouxster115 Wrote: [\[CITE\]](#) When ETH doesn't become mineable, what currency will you think is best to mine?

It will depend on your mining rig. You may want to take a look into mining XMR, Sia seems to be profitable, and anything else that may come out. That time is a ways off though.

`RaZoR - June 17, 2017, 7:13 am

I'm willing to invest like 63k USD for mining farm, do you think its a good idea?

if yes, any suggestions for me?

and what do you think about silent miners on HF?

Gunrox - June 17, 2017, 7:19 am

(Jun 17, 2017 07:13 AM)`RaZoR Wrote: [\[CITE\]](#) I'm willing to invest like 63k USD for mining farm, do you think its a good idea?

Your budget is absolutely insane but it's unnecessary to use it all. The amount of money you have to spare here, you're honestly better off investing into crypto currencies and if it works out you'll probably be a millionaire by the end of the year.

(Jun 17, 2017 07:13 AM)`RaZoR Wrote: [\[CITE\]](#) and what do you think about silent miners on HF?
Since you have a very big budget I wouldn't advise purchasing miners from this website. In my honest opinion, you would find a better and stonger miner on the forum bitcointalk since they have a bigger community and are based on this topic.

`RaZoR - June 17, 2017, 8:44 am

Thank you for the reply,

i already invested around 90k on crypto currencies and i stop from 90k

just want to try different methods too thats why i'd like to get advise about rigs

maybe like 4-5 rigs for start and if it all going good i will invest more and more. i think thats the best.

i will be buying at monday 4-5 rigs items,
what you prefer for a good rig?

Gunrox - June 17, 2017, 8:50 am

(Jun 17, 2017 08:44 AM)`RaZoR Wrote: [\[CITE\]](#) i will be buying at monday 4-5 rigs items, what you prefer for a good rig?
<https://imgur.com/a/wRSoQ>

I am fortunate enough to have a shop with space for me to setup my mining rigs. So far I've just gone with the open "bench" setup to save on costs and to make cooling easy.

If you look at the photo provided, you can see the bench with three rigs (a mix of 5870, 5970 and one older 5840) on the floor is the Bitcoin solo server running in -server mode, which also has 2 5870's. There are a couple of other machines in my office with 5870's elsewhere. I am at 3.8G/hash and adding about 1/g/hash per week buying up cheap used cards via craigslist.

I am working on building a good Ubuntu Live ATI ISO file today in an attempt to eliminate all of the hard drives by using USB thumb drives, that'll save on electricity as well as hardware costs going forward.

Silent - June 17, 2017, 1:53 pm

Looking to build a mining rig.

Budget is around \$2k~ but can easily be expanded by 2-4x

Source of cash wont stop and it will run at my sisters place with very low electricity costs.

Please recommend a build. Ill probably start mining eth or whatever most profitable. Havent looked exactly into what the rates are right now

SIM-2562043 - June 17, 2017, 2:46 pm

Great thread

I'm open to any questions

Silent - June 17, 2017, 2:51 pm

Not sure if anyone could recommend me a mining rig?

Planning to use 1070's not sure what else.

Budget was said above.

Gunrox - June 17, 2017, 2:55 pm

The Radeon R9 295X2 has by far the highest hash rate (46.0 MH/s) of the Ethereum GPUs on the market and will cost you \$600. It has a power cost per day of about \$1.44, a return per day of about \$1.61 and a cost per MH/s of \$13.04. This gives a return per year of \$586.43.

Meow - June 17, 2017, 2:55 pm

What is the best coin to invest right now? I have a feeling it's too late to invest in to BTC now, maybe ETH? I have a feeling ETH will grow a lot, maybe buying a few ETH coins isn't a bad idea.

Gunrox - June 17, 2017, 3:06 pm

Ethereum has the best long-term potential of any cryptocurrency. Right now Bitcoin is still king, but I think Ethereum will become #1 in short order.

We can compare Ethereum to Bitcoin in the following charts:

<https://imgur.com/a/oPqoT>

There were 162k transactions on the Ethereum blockchain on 5/19/2017.

Here is a chart of the confirmed transactions on the Bitcoin blockchain.

<https://imgur.com/a/Aj3F7>

Which chart looks more bullish?

There are already almost half as many transactions on the Ethereum blockchain as the Bitcoin blockchain, and Ethereum is growing exponentially, while Bitcoin has reached its maximum capacity for now. Cryptocurrencies, like social networks, have extremely strong network effects. As the adoption of Ethereum continues to grow, its utility and value will grow exponentially..

As you can see from chart above, Bitcoin was experiencing rapid growth until the beginning of 2017.

Yeah, that is what I was thinking too. I haven't been in "the game" for a while but coming back to HF I can see more and more people turned to cryptocurrencies and that speaks a lot for itself. I think I will invest in ETH and see where it goes. I will leave BTC for now, unless something major happens and Bitcoin starts to rise a lot.

Obviously. I was just asking for his personal opinion & prediction.

Gunrox - June 17, 2017, 3:17 pm

(Jun 17, 2017 03:15 PM)Meow? Wrote: [\[CITE\]](#) By how much do you think ETH will rise by the end of the year? \$1k?

\$1k seems out of the ordinary if I am honest with you, my personal guess would be around \$150/\$200 more than it's price as of this post. But you never know what happens in the crypto currency world, the tables could turn in your favor or not. It's purely a waiting game but there are quite a few hints that etheruem will increase development wise and economically.

AMD's Radeon R9 295X2 stays just under 450W there as well, which goes to show that if you're not collecting data quickly enough, your results will be way off. Theoretically, this is classed as the PSU killer. A few reviews indicate that it becomes very very hot whilst mining and can reach up to 59 degrees centigrade. There is money to be made with this product, it's all based on your setup and management.

Silent - June 17, 2017, 3:30 pm

I cant seem to find a solid answer anywhere.

I believe it is nearly negligible. If you overclock them properly they should be within 0-2 mh/s range of the 6GB. 6GB are just immune to DAG increases and better for resale value (when it comes to mining, specifically).

(Jun 18, 2017 04:47 PM)hk_Reborn Wrote: [\[CITE\]](#) I want someone help me about this syntax : stratum+tcp://stratum.sye.host:PORT -u "Your_Wallet_Address" -p Anything
