Thread: [Bulk Email Sender Software](#)

WayToSwag - June 17, 2017, 1:51 pm

Hey HF,

I'm looking for a free bulk email software that could send more than 200 emails per day. Or suggested software which I could find in the ? bay
thx in advance

Any way of doing it for free, and without all the contact names appearing in "Send to:"? Cuz I searched for it and I needed special plugins.

Ishityounotmate - June 18, 2017, 9:01 am

Pm me, I have couple of web-based email senders plus smtp servers aswell to deliver the emails direct to inbox.

Posting to get posted in case you get this.

OP Please let me know if you got a solution for this. I need it too ..

Thanx

Use mailchimp, you can send up to 1-2,000 if i remember correctly a day for free.

But does mailchimp deliver directly to inbox?

And I dont want a sender that will show that I have sent to many others..

Please clarify for me if you have used it.

Thanks in Advance Flex

If this is for legitimate purposes and the domain is clean you shouldn't have any issues.

Mailchimp is used by many companies.

I think SendBlaster can help you in this may be.

PerfectStorm - *December 13, 2017, 1:48 am*

Advanced Mass Sender will do the trick
