Thread: [My Journey to 100k till the end of the year. 33 / 100k](#)

CryptoWorld! - June 18, 2017, 3:42 am

Alright, so I decided to post this as a motivation to all of you who made basically nothing over a years spent online.

All of this I started exactly a year ago when I finished my college and decided to put some effort and time researching money making methods and most of them are really bs but the rest of them with proper knowledge and research can bring shit ton of money.

It took me literally 6months to learn and gather enough information to start making money online, so at the very beginning of this year I was sitting at 0\$ in my bank account. A week later I managed to make few hundreds ewhoring and quit it as soon as I got my first goal witch was \$1.000. It was quite easy way to get your first money even tho it wasn't satisfying job at all. Soon after I started with cryptocurrencies and this is where it all began. :)

I made \$33,000 in less than 3 months and I set up my next goal to be 100k till the end of the year. Also I just withdrawn 5.000 euros just to have some good time while the summer lasts. The rest of my money wont be touched until I hit my 100k goal no matter how long it takes but im 100% sure im going to reach and achieve as I did with all my previous goals :)

To all of you who still thinks making money online is impossible and they can't find a way to make any bucks, you're not trying hard enough and if I managed to make \$33.000 starting with 0 then im pretty sure you or anyone else can do this.

Proof :

Things I did to make this amount of money are :

Ewhoring; Amazon gift cards / purse
Crypto; Investing / Trading / Mining.
Shopify/Ebay - Mostly reselling / drop shipping.

Investing your valuable time into learning and researching any of these methods will bring you guaranteed earnings.

The results and final income are individual. ?

100k for this year is my goal also. I don't think I will achieve it as it is already june and im only at just a bit under 10k. Still got 6 months to achieve it. Gotta work hard to get there.

I'm pretty positive that you will achieve your goals if you want it and willing to sacrifice yourself and put hell of effort to get it!

This is the pattern to my success and im 100% sure that you should follow these steps to make your self where you want to be ;

1. Self-Talk
2. Intentions
3. Grit
4. Strategy
5. Execution

Good luck on your journey man :)

OT

Congratulations bro ?

I have the exact same journey as you, I did ewhoring, bought a phone and I still have some left. Currently investing in crypto's aswell.

Right now I am focussing on dropshipping for a long time too, but the startup is pretty rough for me. Im still underage and I cant have a creditcard to pay the shopify subscription lol. So im going to try WooCommerce later when I have vacation.

Also a question; where are you from? You seem dutch to me
Would you mind me adding you on skype/discord? Please send me a PM regarding your details. If not, thats also okay :)
I gotcha buddy, will send you free two months subscription for your shopfiy later on.

Thanks
No man, fuck paypal worst payment processor ever. I'm using crypto debit cards and they do the magic for me to be honest. Stay away from paypal, nothing good comes from them
