Thread: [If I was to have 2000 twitter accounts, how would I make them mass follow an account](#)

WIZ4RD - June 18, 2017, 11:26 am

As the title states, if I was to have access to 2000+ twitter accounts, is there a script/bot for me to purchase or even just use to make them follow a single account. The same way a lot of follower services/shops do it.

Please look past my negative reputation and help me, would be much appreciated lol ?

EDIT: same goes for Instagram, youtube etc

memehack - June 18, 2017, 11:30 am

posting here to come back later :)

Frankey - June 18, 2017, 11:32 am

I think that there are some scripts/programs out there that can do this. But I don't think making this your self is that hard.

Yeah I've seen some interesting videos of the said subject, really worth a look into learning how to really, but as an american; if there's a easier way to do it, do it.

I haven't seen this type of program yet. But yes people who sale likes and follower use bot to provide like +1000 follower and +1000 likes.

I think it will be easy to make bot yourself. Maybe imacros?
