When Orgy Was making a living off 12 year old's who think they "Run XBL" Joke. AK47, Don't take this seriously.

When all the hype was "DOODE DON'T BUY DDoSeR, JUST GET TWBOOTER LOLZ"

When Orgy Created what the marketplace is today. Filled with a fuckload of god damn fucking shell-based booters. Start with 1, end with over 9000.

Zain, multiple people have told me, and so far they've all failed. I understand though. You're skids that wish they could be as successful as I have been over the past couple months, and you think you're going to scare me with your skiddy little threats.

Won't happen.

The shellbooter is the worst thing ever to happen to a datacenter.

Orgy - July 25, 2010, 2:37 am

xZerox coded the client. All of the actual ddosing and backend was coded by me.
