Thread: [\[Source\] Randomly Generated Memebot](#)

**klorox** - June 19, 2017, 12:31 pm

<http://www.mediafire.com/file/5a6lldk97f6fcp4/memer.rar>

Download the source and everything needed there.

Here are some example outputs from it: [imgur.com/a/NuZl9](http://imgur.com/a/NuZl9)

Haven't looked at the source, but the examples are pretty funny xD Haven't seen anything like it OP, not in python anyways.

Thanks! I need to configure more templates for it sometime but it's kind of a tedious process.

**Frankey** - June 20, 2017, 1:36 pm

This is cool! :D Also learned some stuff from it, ty!

Outputs look great, could you upload the source to pastebin or gihhub?

Absolutely. Here's a link to my github:

[github.com/devinatoms/Python-Randomly-Generated-Meme-Bot](https://github.com/devinatoms/Python-Randomly-Generated-Meme-Bot)

You'll still need to download the .rar file with the templates inside. I could upload all of the templates to imgur if you need but I assure it's all clean if that's what you're worried about.
