Thread: [\[FREE\] Instagram auto uploader,follower,liker,commenter,account creator and unfollowe](#)

gaidenukstiskrv - June 20, 2017, 1:27 am

Hello everyone,

I want to introduce you to my second application! The Kigbot - instagram auto-liker,commenter,follower,unfollower,uploader and account creator!

[img]http://www.kigbot.com/images_howto/auto_follow.jpg[/img]

This bot is completely written in python. I want to contribute to the community and I am releasing this completely for free.

You can download it at <http://www.kigbot.com>

About the bot:

Likes per 24hours: 2880

Follows per 24hours: 2880

Unfollows per 24hours: 2880

Comments per 24hours: 864

Uploads of pictures per 24hours: 24

Accounts created per 24hours: 100-500 (depends on the free proxy speed that the program is using)

I understand this application is not perfect yet, as I am a beginner programmer with about 6 months of experience (4 months php and 2 months python), yet I really wanted to release this bot and receive some feedback on it!

If you have any suggestions, comments or anything else feel free to contact me!

following this thread! Thanks OP for this, will try this when I get home later :)

Jks153 - June 20, 2017, 7:42 am

Im gonna test this and see what its like thank you for your contribution.

APP Doesn't work you run and it automatically closes.. feels like a virus but again I have no clue in these things.. I'm gonna run my virus scan now :S

Deep_ - July 18, 2017, 5:58 am

sounds good but I will wait for a review or a virusscan till I am on my phone rn
