Thread: [Chrome Changing Colors?](#)

Chief - June 20, 2017, 1:05 pm

So as you can see in this picture the BG of HF and the BG of the picture aren't the same. On other browsers they are but on Chrome, it is changed. I have reinstalled Chrome and I still have the error? What could be causing this?

Change board style I think

Shoe - June 21, 2017, 11:49 am

Is the image transparent? I don't think it is -- It's likely been color matched to match HF's default grey background.

Change board style I think I have it set on default

(Jun 21, 2017 11:49 AM)Shoe Wrote: [\[CITE\]](#) Is the image transparent? I don't think it is -- It's likely been color matched to match HF's default grey background. It's color matched but on Safari it displays fine so Chrome seems to be lighter for some odd reason

What the fuck? How do you have this?

????Kosdff - July 8, 2017, 9:58 am

Off topic: What theme do you have for hackforums?

Chief - July 8, 2017, 10:43 am
