Thread: [\[Public Release\] CLF3 - Never Lose Access Ever Again](#)

**JoshuaSmith** - June 20, 2017, 4:27 pm

Today I'm releasing my spreader that i made and was selling but due to work and life i don't have a lot of time anymore so we are here.

This release may not be fud but when i have time ill go back and fud it.

Coming Soon!:

Upcomming Functions:

Running Sandboxed.

Running with Full UAC

Java Check

Install Name

HWID Check

Like i stated many times when i get free time ill be adding some more to this and ill be keeping the entire project free as i cba to sell it anymore.

Bugs:

Code None that i know of but i only opened the project to remove the login system and haven't really checked other than that..Software Notes:

Made In Delphi

Comes with UPX

Functions:

Upload/Execute

Reboot/Shutdown PC

Builder Functions:

Mutex

Start Name

Enable/Disable Startup(New Version)

Compress With UPX

Install Dialog Option

"Spreader"... Does it actually spread itself after execution? All I see is a small CnC that allows you to upload and execute.

You should make startup an optional thing upon building, though. Dropping to %temp% and using registry startup is not convenient and triggers certain antiviruses.

**JoshuaSmith** - June 20, 2017, 5:01 pm

i had that in play when it was in development if i get time ill do it.

**QU?CKSILVER** - June 20, 2017, 5:04 pm

Alright, thanks for the contribution.

**Avira** - June 20, 2017, 5:16 pm

"Never Loose Access Again!"

Lose\*

Also, may you enlighten us on what "never lose access" actually means?

Once this shit hits an MSE detection everyone will lose access.

**Armada** - June 20, 2017, 5:24 pm

Gotta be totally honest here.

No idea what the fuck this is suppose to actually do????

So it connects to your Controller. But has zero functions. How exactly would using this software ensure I "never lose a client again" ?

This is nothing more than a Client/Server application that does nothing more than check in to the controller, and change themes....

**JoshuaSmith** - June 21, 2017, 12:44 am

You use it as a middle man, spreading this allows your to keep your main file hidden until your ready to attack. tbh i was going to have more functions that would help spread its self but as i stated i just don't have time.

Once this shit hits an MSE detection everyone will lose access.

first thanks for pointing out the miss spelling buddy but next time please try to be a bit nicer about it. MSE is simple to bypass and the project had much more in store when i was in development. Plus i would refud the stub if needed and the paid clients would of got an update + alert.

ill keep adding when i get time to work on it and release free updates.

Edit: If your spell checking the video dude i did that to represent an infinity sign but after i notice it

looked like shit i remove it. the video is a bit out dated.

MSE will always detect after max 2 weeks depending on distribution.

**JoshuaSmith** - June 21, 2017, 12:14 pm

(Jun 21, 2017 09:00 AM)Armada Wrote: [\[CITE\]](#) So this does have DL & EXE?  
No it has Upload and Execute.

(Jun 21, 2017 11:47 AM)Avira Wrote: [\[CITE\]](#) MSE will always detect after max 2 weeks depending on distribution.I'm sorry to say this but your wrong.

**Avira** - June 21, 2017, 12:27 pm

(Jun 21, 2017 12:14 PM)xmods1337 Wrote: [\[CITE\]](#) No it has Upload and Execute.

I'm sorry to say this but your wrong.  
How so?

Get someone to heavily distribute one of your stubs to win 10 builds and you'll see.

**z3ro-cool** - June 21, 2017, 12:29 pm

(Jun 21, 2017 12:27 PM)Avira Wrote: [\[CITE\]](#) How so?

Get someone to heavily distribute one of your stubs to win 10 builds and you'll see.If someone heavily distribute it gets detected because people scan it in virustotal.

Check the hash in vt, aslong as you use a properly developed downloader you will only have VT via third part software (Such as multiple endpoints and Process Hacker)

You should make startup an optional thing upon building, though. Dropping to %temp% and using registry startup is not convenient and triggers certain antiviruses.

I added a updated version to the post with now allows you to enable/disable startup.

stay tuned to this thread as ill keep updated shit and adding shit when i have free time. :D

**00australia00** - June 24, 2017, 10:11 am

Anyone tried on windows 10? It is getting hard these days

**QU?CKSILVER** - June 24, 2017, 10:27 am

(Jun 24, 2017 10:11 AM)Amlun Wrote: [\[CITE\]](#) Anyone tried on windows 10? It is getting hard these days  
???

**JoshuaSmith** - July 2, 2017, 9:10 am

update coming soon :D With Some new things.

**Hecate** - July 2, 2017, 10:17 am

Me opinion this application is useless.

**Armada** - July 2, 2017, 10:24 am

(Jul 2, 2017 10:17 AM)Hecate Wrote: [\[CITE\]](#) Me opinion this application is useless.

So it this post, your point being?

Who cares what your opinion is, honestly. Some might find use in this tool. Just because you do not does not make it irrelevant. or useless. Perhaps you should hit those technical books a bit harder before posting next time to see the reasons nd benefit of such a tool before posting. ????

**Hecate** - July 2, 2017, 10:44 am

(Jul 2, 2017 10:17 AM)Hecate Wrote: [\[CITE\]](#) Me opinion this application is useless.  
i respect your opinion, what would the software need to make it better in your eyes.

PS: remember this is not a full fledged rat as its used to protect your main stub but I'm willing to add anything that as long as it make the users happy.

-Josh

Sorry, not 100% sure about what this is - Is this like a client holder?

**Goldmouth** - August 4, 2017, 5:34 am

(Aug 3, 2017 08:59 PM)M.D. Wrote: [\[CITE\]](#) Sorry, not 100% sure about what this is - Is this like a client holder?

Yes pretty much.
