RAMNODE LMAO. Once they are aware of your actions you do realize you're getting fucked.

mirai_isnt_dead - June 20, 2017, 11:05 pm

hostsailor obviously lelelelelelee

stackoverflowin - June 21, 2017, 5:21 am

Ramnode? What the fuck, they're far from it. They won't even accept orders that are wanting to be paid by Bitcoin without verification due to the amount of abuse they're receiving.

mirai_isnt_dead - June 21, 2017, 5:38 am

your prices are fucked up very bad

btw amazon aws servers are bulletproof vouch

Axiga - June 21, 2017, 6:15 am

Please kids buy from these host ;) you are gonna get banned within 14 days

One abuse email (even automated by fail2ban) will make them terminate it.

Nice share OP

Thanks ?

joe9s - June 24, 2017, 6:29 am

Interesting, thank you for the informations

aana - June 25, 2017, 8:03 am

i have used elkupi.com for awhile now and it allows me to host my file sharing site that includes many different copyrighted software so i can say they do not care about this. malware on the other hand i have not tested but they certainly could care less about DCMA.

I have also used anonymously.io and i used them for a forum but never really done anything with it.

they only require an email address and to send bitcoins to pay for the hosting so its pretty anonymous. but i did not test it other than to host a activist forum.

The piece of shit "coachhip" is SCAMMER stole my money and now making excuses. You are online all the time on skype and replied very fast before purchase and after purchase, you are not replying to me and scammed me with \$40

See reference here: <https://hackforums.net/showthread.php?tid=5652702>

This guy coachhip is a SCAMMER and don't buy anything from him. He will steal all the money and never reply you back. Before making the payment he will agree on anything and after making the payment he will not even reply you.
