Thread: [Consensus | consensus.fun | CryptoCurrency Investing Simulator | \\$85 + GROUP INVITES!](#)

Xeenon - June 21, 2017, 5:50 pm

We, here at Consensus would like to present something that has taken us hours upon hours of web development and coding. Some of you may know all of these stock investing simulators, also known as stock games. Well, we here at Consensus decided it was time to spark the crypto section up.

We are proud to announce that our cryptocurrency exchange simulator is FINALLY HERE!

Go visit the site at: <http://consensus.fun/>

How does it work?

Once you visit the website you will be prompted with an index site explaining you a little behind the website and the entire story. In the top-left corner will you be met with a login/register button. Once you have registered you will automatically receive 1 BTC. Be careful with how you work with this 1 BTC as you are not able to get anything refunded. Your objective is to invest in the correct coin, and end up in the first place on the leaderboard by July 31!

There is the ability to chat with others who are currently on the website by using the trollbox met on the left side of the website. Remember to have fun!

Competition

Now here comes the exciting part ...

THE PRIZES! Obviously, there is going to be an introduction contest for this amazing website, and

it goes as follows:

First place: \$50 + an invitation to Consensus.

Second place: \$25 + An invitation to Consensus.

Third place: \$10 + An invitation to Consensus.

We will be choosing winners and be closing this competition by July 31. Are you going to be top three on the leaderboards by then? You better!

Thank You

Huge thanks to [Skidy](#) for his tremendous work on this. Without him, I wouldn't be able to release this project for you all today. He is sadly banned for a little while due to a thread he made, though, make sure to show him love in the trollbox on the website!

* Members of Consensus may participate in the competition, but will not be receiving any prizes for obvious reasons. If one of the Consensus' members end up in the top three, then he or she will be excluded and we will take fourth place in as third place. Cheating is NOT tolerated and will result in a ban and you being permanently suspended from future Consensus events.

Don't spoil the fun for others in any way, or you will be banned.

* We may wipe/ban your account if we find an appropriate reason as to why.

This is lit man! This will surely make lots of people cry and regret lol (iykwim)
Amazing work all of you :)

Caliban - June 21, 2017, 6:06 pm

Amazing work man. Site looks neat!

Guardians - June 21, 2017, 6:38 pm

Looks amazing, can't wait to take part and claim my group invite to Consensus :)

DenizZ - June 21, 2017, 6:47 pm

I'm sorry everyone, as you have no chance of winning since I will be participating ?

Xeenon - June 21, 2017, 8:48 pm

It is finally here! Comment or message me with any issues or questions you may have.

Legacy © - June 21, 2017, 8:52 pm

Goodluck everyone, looks very nice.

mvmt - June 21, 2017, 9:49 pm

Good luck to everyone participating! Should be a fun and unique contest.

Im High - June 21, 2017, 9:53 pm

Seems interesting enough. Thanks for the opportunity. ?

Fortunate - June 21, 2017, 9:54 pm

Looks awesome.

Are any of you having problems with the email confirmations, haven't received mine yet.

EDIT: Just took a while, got the verification now.

VirtualFrost - June 21, 2017, 9:57 pm

This is awesome, apart from the gaming groups it's good to see groups doing something that is off-site. Awesome and interesting project, going to give this a go.

Riggs - June 21, 2017, 9:58 pm

Nice setup. Good to see some competition in crypto. Hoping to see a lot of participants.

Fortunate - June 21, 2017, 10:06 pm

Is it possible to add a % to your portfolio how much each coin has multiplied in value? Just because if you invest in multiple coins it's hard to keep up which one has lowered in value.

Would be cool!

Im High - June 21, 2017, 10:08 pm

I forgot my password already and for some reason I can't click on the forgot password link D:

Batzii - June 21, 2017, 10:10 pm

I really like this concept, this site will stay up right?

theDuke - June 21, 2017, 10:53 pm

Let's see how this pans out :D

Fortunate - June 22, 2017, 12:03 am

Is there a delay/a problem with the site?

I invested in a coin and it has gone up 3% since. I only have 1 currency which has only gone up and I still keep going negative?

From what site/API do you get your coin prices from?

EDIT: Oh, Poloniex. I got my prices from another site, smh.

We currently have 68 registered users! You better get started soon, or you might just lose!

Craggy - June 22, 2017, 9:57 am

Excited to see who is going to win this

makawan - June 22, 2017, 10:06 am

Day traders wya lol. This would be fun tho. Seems like the stock market game that I used to play.

Xeenon - June 22, 2017, 11:20 am

This should be stickied as soon as Omni gets online. Hopefully, that will bring more activity.
Current user count: 75.

Halved - June 22, 2017, 11:34 am

I found a major bug.

When you add a minus to the sell currency, no matter how much you have you can gain BTC.

Example;

You should probably get this fixed and then restart. Thanks.

Cylow - June 22, 2017, 11:44 am

Just signed up. Really fun. Watch me beat em all.

Everything is back to normal. ?

– We have backups running every 30 minutes.

AlphaIndustries - June 22, 2017, 11:48 am

Signed up, seems really nice, only bad thing is that I am not invited yet :p

GloryToBe - June 22, 2017, 11:51 am

Thanks for doing this, created an account and I'm now in 12th place.

Cheers. I'm no investor, so I don't think I have a chance, but I'm going to try and break your site, and report back to you if I find anymore bugs ?

Good luck everyone!

(I didn't mean that in a rude way, I'm trying to do you a favour with bug finding, I'm not trying to be an asshole!)

Xeenon - June 22, 2017, 7:21 pm

Come-on, don't let my IRL friend take the lead. He is being so cocky about having first place.

Pretty cool man, keep up the good work.

Fortunate - June 23, 2017, 12:32 am

Digibyte fucked me over badly but oh well.

It's a cool site and a cool concept. Hopefully we will see some improvements soon and possibly new coins.

Keep up the good work :)

Just signed up and put everything in Siacoin, good job Lookin & Skidy!

thales - June 23, 2017, 1:07 am

Signed up but all of the coins I'd like to invest in are unavailable. I put like 0.00000001 btc into ethereum just to get myself on the leaderboard lol. Also, how come short selling isn't available or even on the next update list?

DevNet - June 23, 2017, 1:12 am

Please add support for quarkcoin.

This is a game where you test your knowledge, prediction and researching abilities in order to gain first, second or third spot. Short selling would have absolutely nothing to do with a day-traders perspective or a regular investor. This isn't about having people lay out their money for you, it is you risking your own money.

As per coins from Bittrex and Kraken - they are going to be added very soon. Managing every chart/graph for every coin is just a hard task.

It's going to be even more fun now with the competition.

Xeenon - June 23, 2017, 10:27 am

We now have all the coins from Poloniex AND Bittrex added. Happy trading!

Unexplained - June 23, 2017, 10:33 am

I will be signing up for this the moment I get home. I have been looking for something like this for awhile now. I do wish shorting was an option though. Being able to correctly predict price going up or down can both be profitable! But I like what you're doing. ?

Zuse - June 23, 2017, 11:44 am

Great idea, can't wait to see who wins this.

Short selling to practice maybe? Short selling is a huge part of markets too. Not sure how you say short selling has nothing to do with day trading. That's the stupidest thing I've ever heard. I've never

met a decent day trader who hasn't short sold.

You can short sell on Poloniex btw not sure if you're aware.

You can short sell on Poloniex btw not sure if you're aware. I know you can, but this game is about your level of prediction and knowledge of researching. This game isn't about having a backup plan, it is merely about either:

- a) Luck.
- b) Knowledge

Yes, you can use short-selling for day trading, but it is also a backup plan for helping you out in the long term. This game is strictly about seeing how far you can get with purely your own money, knowledge and luck.

For the future, implementing short selling is definitely something we can do - but for this game? No.

For the future, implementing short selling is definitely something we can do - but for this game? No. Well... Short selling is definitely something that is used in trading in the "real" investment world. Most exchanges that I've come across the list of coins you can short are always very small compared to what is out there. Personally I would love the ability to go short.... especially when these pumps go parabolic in a week.

But hey, that's something to consider for the future.

Liking the site. I'll keep this running on my phone at work. Look forward to seeing who's at the top. ?

Edit: One suggestion. Don't let the current holdings of other traders show publicly. Only show previous and/or closed positions. This prevents fuck boys just going in and copying people.
