Thread: [XTO. Groundbreaking Crypto for the music industry AND MORE!](#)

VovaPutin - June 22, 2017, 1:35 pm

XTO(Tao) is a blockchain initially built for the music industry however, recently has recieved vc funding from source to diversify into other industries. Has the infiniti protocol being released in the next couple of months which is an elephant in the room type project. The whole thing is honestly an elephant in the room project. (At this time) market cap is 1.4mil, price .04USD/1500Satoshi. Project manager is constantly making connections and recently has been in contact with Pandora,RIAA, SOCAN(BIGGEST players in the music industry), etc. and has begun integrating their platforms into the Tao blockchain. I highly advise one to do their research on this gem because this is a TOP 100 coin easssssy(y(x20<)). Currently traded on C-cex (dont buy from livecoin, xto transactions not functioned properly there atm). Once this baby hits bittrex.... jeez ?? Goodluck Fam !!
