Thread: [PayPal Bank DEPOSIT without having bank linked to PayPal](#)

Ultra Hacks - June 24, 2017, 3:20 pm

So as the title says I want to deposit money from my PayPal account to my bank without having a bank account linked to my PayPal.

Sounds weird but this is the reason:

Already have the maximum bank accounts linked to another PayPal accounts where I don't remember the email, phone or password anymore.

If you still don't understand this is what I mean.
[ONLY EXAMPLE MAY DOES NOT WORK]

1. Like transfer PayPal money to Neteller, then from my Neteller account transferring to my Bank account which is linked to Neteller.
2. Buying OWN products from selly.gg with PayPal, the transfer the money from selly.gg to my bank account.

Hoop you guys understand what I meaning I think i said enough.

Please don't answer call PayPal, send message, Remove bank from the other PayPal account.
SERIOUS QUESTIONS WITH ANSWERS ARE ALWAYS WELCOME, PM TOO!

Thanks for your time and for being interested ?

Just link it and then unlink it after. You can later link that same account to another PayPal with the same name.
