Thread: [Any Faceit CLIENT hacks?](#)

TheTurboEngineers - June 24, 2017, 6:04 pm

Everyone just supporting those client sides.

However played a faceit game last week and we lost badly because If a cheater.

So they must be some cheats that supports the client faceit?

LanDodge - June 24, 2017, 6:22 pm

Private ones yes. I know of 0 p2c or even most slot based that support client atm :/

If you can find a cheat that works on ESEA, it should be undetected on Faceit.

From xstrike feature list: FACEIT Server-side.

So unfortunately leaguemode does not.

Unless there is some closed beta or something along those lines.
