Form (signature/avatar):
Logo

Size of the piece:
The higher the resolution the better.

Color preferences:
Nothing specific, however make it in a way that if it were to be changed to a different colour there wouldn't be major changes to make.

Other preferences or information (texts/effects/fonts): The brand is called "Gang Clothing" - The logo is based around the concept of "GXNG" - Whether you want to use just straight text or maybe create a little graphic to go with it I'll leave to you as you're the creative. Just make it something you'd be happy to have on something you're wearing.

Hiya,
Some yesterday I am able to add a custom emoticon on my stream @ twitch.

It would be cool if you could create something for me,
It would have to be in 3 different sizes. Hope you don't mind.
All files have to be smaller than 25Kb, saved in PNG and with a transparent background.

File sizes:
Small: 28*28 pixels
Middle: 56*56 pixels
Large: 112*112 pixels

what you want: Emoticon
what colours: Green(#00ff00)/red, Stream setup colors.
what text: No text.
what theme: Leaf-themed.
anything else you want: My [logo](#) can be used as either inspiration or as end result (without the background & text would be awesome too)

I like it, could you possibly change the text to just "GXNG"? - Also a white version to be printed on black shirts/caps.
