Such a great opportunity.

Banadmin - June 25, 2017, 3:40 pm

Indeed. I sold a week ago around the \$380.00 mark. Happy I did so but will be definitely reinvesting soon.

I currently hold quite a bit of ETH.

I believe it will rise again.

Should I put \$200 into ETH right now or SIA? Can't decide between the 2.

If that is all you are putting in I would go with Sia if I were you. Better chance to make more money since it's so cheap.

Personally I cashed out my 1.2 million Sia and put it in Eth Friday though feels like a safer bet to me as if now

Just bought another 8k of eth. Great opportunity!

DenizZ - June 25, 2017, 6:07 pm

It's such a great moment to buy-in. I'm trying to buy as much as possible.

Guardians - June 25, 2017, 6:08 pm

Consider yourself lucky if you bought in at \$250. Should see some decent profits this upcoming week after the correction & weak hands.

If you have the \$\$\$ handy and are a late comer... this is an amazing opportunity to invest in ETH

Wow, I really didn't think this thread would be considered a pump. I thought that rule would be mainly for crappy coins no one really hears about. ETH is too big to pump, no? Sucks he got banned =/
