BEFORE YOU READ THE REVIEW Spoiler [\(Click to View\)](#)

-You must understand that the reviews I make are from my point of view.If I grade 3/10 that doesn't mean the method itself is bad, maybe for other people that method is 7, so keep this in mind when you're reading my reviews.

-My reviews will probably piss off many people and break some of their businesses ...or raise them.This means I will not debate with the sellers whether or not my reviews are accurate.Unless there is really something wrong I won't recheck my analysis.

-I review good and bad products, not only bad products as some of you may suspect.In the end, remains the decision of the reader if it's bad or good.

Personal OpinionSpoiler [\(Click to View\)](#)

My reviews consist of 100% personal opinion and thoughts. I am in no way affiliated with the product in any way unless stated otherwise. Your experience may difference from mine and this is review is not final to the actual product. Although, I am trying to provide the best review as possible to ensure and maintain a clear and safe marketplace.

Tier 6/Tier 10

His sales thread contains mixed types of replies. Around half of the replies are from him saying 'Thank you for purchasing this method' or 'I appreciate your honest feedback'. There are also small reviews on the sales thread of Supreme Doxing, but it's limited. He has quite a lot of friend-vouches or past experience vouches, which I don't consider valid so that is why I left those out of the considerable valid reviews. If I was a buyer myself I'd like to see some sneak peaks of the inside of the eBook, things can be blurred out but now the buyers are with empty hands and know nothing before buying the method. Maybe that's a marketing trick but now we only see the sales thread design.

Vouches such as "Vouch for X, he always has great products!" , "You can't get wrong with X!" , "I vouch for this guy he knows what he's doing!" , "I tested out this product, it works! Great Product!"

are not taken into consideration. Vouches without legit-proofs are not taken into consideration. Text-proofs are not taken into consideration. This is a community and in the end people connect to each other either by friendship or a common interest they'll provide a vouch.

Tier 6,5/Tier 10

I've seen few paid and free eBooks so far regarding Doxes, but never this details for this price. There is currently a sale going on for \$5 to purchase this guide. The actual PDF file has thousands of words included as well as tens of images and instant links that redirect to the web page he's providing and stating in the guide. Every image is detailed and shows grids and arrows to the highlighted part. I was blown away by the amount of content in this guide. Normally I'm not too positive about guides and methods but for \$5 you can't complain. I'd love to see some more detail in certain chapters of the guide as some chapters have fairly limited information on them. The design of the guide is simple but the font is quite a bit hard to read for me as I have dyslexia. The small

details such as grammar as hard to notice but they are there. I'm not sure if this was intended but the guide as a anti-leak system built in. On every page it shows your IP as well as user email to if the product is leaked it can be traced back to you. On the end of the guide there are over 30 links to webpages, databases, resolvers, lookups, and useful other links that could help you on your way to your full dox. If the font was updated, and some chapters a bit more details this would have been a great eBook for \$5. But as some of the chapters have public and saturated methods I rated it a 6,5. For its price you can't go wrong, I've learned quite frequent a lot from this guide.

Easy to follow methods, I've tried the steps on myself so it all goes faster when doxing yourself, practicing on other members takes longer time as you have no information about them. Glad you like it. ?
