Thread: [Buying BITCOIN with PAYPAL at 0% Method NOT COINBASE \\$3000 per WEEK](#)

Cyber Knight - June 27, 2017, 1:24 am

I am into Cryptos and Exchange, so I do know a method where you can exchange your PayPal to Bitcoin at 0% fees. All it takes is \$1.5 per transaction, no matter how big it is.

This isn't Virvox, Coinbase or some public-ass method. This works almost everywhere (Except Asia). You do need to enter your personal information to get verified, but that's not an issue because this is 100% legal and whitehat.

Just to clarify you mean it will be 1:1 exchange? : Yes, \$1.5 per transaction, that's it!

Does it require any minimum exchange or any amount? : Nope, absolutely not.

Is there a cap on using it like a maximum amount? : Nope, Just \$3k per week.

Can this be done online or requires physical presence somewhere? : 100% online. No need to move your lazy ass.

Is it legal method or gray hat? : 100% Whitehat

Would you run into any complications being a minor and/or not having a bank account? : If you have a PayPal, that's it.

I will be taking on more questions below.

I want to sell this method, what should be the pricing be? I am willing to use a trusted MM for all deals.

Fizure - June 27, 2017, 1:28 am

If you want someone to vouch for it lmk. I could use this method. Pricing should be around \$5-\$10 since your only giving us a website I assume.

I am not only giving the website. I am also giving out the method. Imagine if it was just the website, people would have found it, and there would be no fuss about it.

Jesus Christ! I had expected around 150 bucks for the method in my mind. And for the review part, I would only handle it to some staff, admin or mentor. Unless somebody qualifies as an exception.

Ninetales - June 27, 2017, 1:36 am

share the info with papa ninetales, he'll tell ya what you're worth.

You can contact Mr.Reviewer or any HQ user. Be aware that some user might share this method with friends!

So choose wisely!

Good luck

Edit: if it's a really private method and really works perfectly then yes people will be ready to give up 100-300 dol for it, especially big traders ! It can save up thousands of dollars!

McRoyal - June 27, 2017, 2:23 am

I am Interested into buying it we can use MM if you want let me know once you decide to start selling it.

Sure. I am getting some reviews meanwhile.

J. McCarthy - June 27, 2017, 8:09 am

Method is worth more to BH types then regular users

If it works as described minimum of \$100

Method is 100% White Hat.

Also doubt it would work for any Black Hat activities, simply due to the nature of the setup.

I am working on reviewing the method that was provided to me but will take a bit of time due to a technical issue with a 3rd party needed in the method.

I thank you for your time and service man.

No fault from myside lol. the third party is having issues. damn, bad time to start selling. Thanks for

an honest Opinion man. We will have to wait for them to fix their issues.
