Thread: [Anyone Like me wanted to become hacker?](#)

d619651 - June 28, 2017, 5:03 am

What is the best operating system for Hacking?

Linux?
Ubuntu?
MAC?
Windows?

Darknuke08 - June 28, 2017, 6:38 am

I do, I wanted to hack bank account / cards.
Probably it's too hard anyway ^^

Linux?
Ubuntu?
MAC?
Windows?

Also new here so hello everyone?,

I'd say your OS choice really depends on what you are trying to do.

I'd say that iOS has the least appeal out of these choices since the coding system is so different.

Linux/Ubuntu are both good. I don't know what your experience is in this area but if you do not have any sort of coding or technical experience, I would not recommend starting with this.

Windows I think would be the obvious choice to start with since it is used the most.

The Master of Incognito - June 28, 2017, 10:29 am

Hey welcome to HF. That is not allowed here on the forums but I would use kali linux for Hacking. Just dont hack bank accounts

iOS has a different "coding system"?

Anyone can write iOS applications in Swift/C/Objective-C/C++/ C# / (HTML/CSS/Javascript) / Javascript / Python / Ruby.

Some of these will require cross-compiling or other dev tools. But the point is it is possible.
