Thread: [Scammed by Windows RT UID=1056824](#)

Zeebass - June 28, 2017, 10:30 am

The member "Windows RT" messaged me about completing a RS Powerleveling Service for me: <https://imgur.com/a/gEK3L>

I had added his Skype and we began to talk about him completing the service for me: PHOTO REMOVED AS ASKED BY WINDOWS RT

We had come to the agreement that I would pay 15m which at the time was 19.33 USD for this service to be done. I purchased the 15m from the website BoglaGold and transferred the money onto my account: <https://imgur.com/a/uG2XV>

I warned the user against using a bot on my account as fear for the safety of my Runescape account as I worked on the account very hard and the account was worth a decent amount of money if I was to sell the account: <https://imgur.com/a/CLmxB>

After waiting around a week I checked the account's level via the Highscores list only to see my account was banned for Macroing (The use of a 3rd party bot): <https://imgur.com/a/mEqxF>

I have been permanently banned and have lost my account forever. I would like to be compensated for the account that WindowsRT lost of mine. I told him specifically multiple times that I would not condone to him botting on my account. However, he had little regard for the safety of my account and botted on my account. I trusted him because of his accounts UB3R status as well as the high reputation he had. If I have left anything off of this scam report please tell me and I will be able to fix the problem.

The user is a very nice guy and it's painful for me to post this deal dispute. However, I have forever lost my insanely good granite maul rushing account that was very valuable. He has offered to pay me 15m back, yet that will not bring my old account back. The value of my account was a lot more than 15m.

To conclude, the user didn't complete the service and he broke the TOS by using a bot. I have lost my valuable account due to this users negligence when attempting to complete the service.

This sucks, seems valid.

Sorry for your loss.

?

@j0ey - June 28, 2017, 10:37 am

Even though this actually seems legit, unfortunately most of the times when you are purchasing any power leveling services its pretty standard that the seller doesn't really take any responsibility for the account.

Wet Rag - June 28, 2017, 10:38 am

Windows RT is a known bot user. You should've done your research.

Please add him to the database as well: <https://hackforums.net/disputedb.php>

Edit: consider his offer below first please. He seems to be willing to resolve this dispute.

Woods - June 28, 2017, 10:39 am

He agreed to your terms so this is a valid dispute. Good luck getting compensation.

W R T - June 28, 2017, 10:42 am

I don't understand this, we agreed that I would reimburse you with the 15M that you put on the account, I will even give you 30m just to close this dispute. I used AHK and that is what got the account banned. I did not directly run a bot client, I had the account on 80/82 mage, I even said to OP I would start a new account for him just because I understand it's my fault and I take full creditability.

If you don't want the 30m then just post that and this can stay open, I am clearly offering you compensation. So take it or just leave this open.

Hope this can get resolved, OP.

EDIT: Take my Skype off the pictures, I don't want my personal Skype public.

And this is a perfect response from the defendant, OP you really can't be so negative about this. Accept one of his options and close this.

EDIT: Take my Skype off the pictures, I don't want my personal Skype public. That's absolutely ridiculous. You know damn well you ran a bot client. AHK is against the rules and can be considered macroing. You broke your own TOS and lied to your client.

Edit: I'm very tempted to buy the user L33t so he can put you in the database.

The 30m compensation isn't justified for what was lost. I had paid 15m alone for the service. That 30m is actually a 15m offer after looking at what I paid. An account very similar to mine is being listed here for the equivalence to 75m....

<https://www.playerauctions.com/rs2007-account/?keyword=50%20att> (Assuming \$1/1m ratio)

I don't mean to be unreasonable what so ever. I am just upset that this user has gotten my account banned after I specifically warned him multiple times about botting. The use of a bot vs what he says his use of "AHK" remains unclear. However, if he was completing a service he shouldn't have been using "AHK" as they are disallowed anyway. Here is a thread from Jagex that is saying that AHK isn't allowed nor has there ever been a 1:1 rule.

I for sure did not use a bot client, I don't know how you expect me to prove that to you. I ran AHK while I used the account from 55-80. Do not sit here and try to tell me I ran a bot client, because you know shit.

I literally told you on Skype I would buy you an account. Is that what you want?

An account can always be recovered. I would like to be reimbursed of the full value of my account in RSGP + the 15m I paid for the service. I have included a post in this thread from jagex saying AHK isn't allowed, nor has their ever been a 1:1 rule. You basically batted on my account whether or not you choose to acknowledge the fact. We can post in the Runescape section and have it be appraised there. Again, I don't mean to be unreasonable, but I don't want to be taken advantage of.

No body is trying to take advantage of you. I will re-imburse you the account + 15m once I get paid.

Do we have a deal?

Because once a botter, always a botter.

Can you post your script you used to bot magic?

Do we have a deal?

How does botting on my OWN account have anything to do with this thread? I got banned for using AHK not using a bot client. Thanks though. We have already made a deal, your replies are not needed.

You keep speaking of deals we have made, yet we are yet to come to an agreement. I want you the value of the account (70m according to PlayerAuctions)+ the amount I paid you (15m) paid to me. This is a fair deal because I have lost my account and lost the gold I paid you for a service that not only was never completed, but ended up in my account being lost.

If you believe I am asking to much, which I am certainly not based on the prices according to Playerauctions. I am in the process of upgrading to l33t and potentially putting you in the scammers database. I don't want to make this situation any worse. You used "AHK" after I told you not to bot on my account. The use of AHK is botting no matter how you look at it.

I'll most likely be putting in a buy order of BTC to assist with that upgrade.

The user knows well that the use of AHK is botting, it was discussed and announced by Jagex that it would be treated as malicious and therefore it was evident that you did not want AHK to be used and he clearly fucked you over hardcore. You should only settle for the 85m otherwise you're doing an injustice to yourself.

This was never agreed upon only discussed, my deal stands. 70m for the value of the account according the player auctions + an additional 15m for the price I paid for this service that was never completed. What I am asking is very reasonable because I lost my account due to your actions. You have 24 hours to justify your actions, or I will be forced to add you to the scammers list. My Runescape account as well as the wealth on the account was lost because you botted and broke the TOS.

I have a reason to warn others even if I saw the Wet Rag rep, why? because it's neutral it has no bloody effect to your number, you DID something wrong no matter what you do to try and fix it, and I have enough time here to know users don't always spend time on rep so it's easy not to see 1 single rep... so excuse me for making it easier.

Since you asked for an explanation:

Regarding last post-

I do agree to my mistake, I lost take of your first post where you did take fault, and I did poorly put "pay off" since you were probably in discussions with OP before this thread.

As for this post-

The lies I was referring to was you "His thread was closed because he already made a scam report, read what Eagle 95 posted." yet the other user I pointed out which had the same scenario wasn't closed, as soon as I did point it out it was closed within 10 minutes. Coincidence? possibly.

Edit: Wasn't RT was either actually coincidence or someone trying to make it look like it was RT.

To the Edit:"Cover bases" line was used a bit hastily as there is no way for me to confirm you having connection to thread closures, but -3 a member after receiving a DWC rep is usually a commonly known way of pressuring a user to remove it.

- Again when I said this I was probably overestimating your gold offers here as you and OP may have been in talks behind this thread.

My Post Regarding Timo's Thread:Today, 01:00 PM (This post was last modified: Today 01:04 PM by Strafe.)Spoiler [\(Click to View\)](#)The Runescape section thread is closed, somewhat suspicious (likely reported by you) since there is another one opened for another user that wasn't touched.

Notice how it was open since yesterday and just got closed 10 minutes after my post today?

Zeebass Thread: Today, 11:30 AMSpoiler [\(Click to View\)](#)Do not trust "Windows RT"

Today, 11:30 AM (This post was last modified: Today 11:36 AM by Zeebass.) "Just putting out a warning about this user as this is his area. We had a deal for a service and he used a bot after he was told not to and got my perfect pure account banned. He refused to pay reprimands (Account value+ money I paid for the service) that he was supposed to after the community agreed he was at fault. Please deal with extreme caution when talking with this user.

I will be upgrading to add him to the Scammers Database."

Zeebass Closure: Today, 11:44 AM Spoiler [\(Click to View\)](#)One deal dispute is enough. No need to create more threads.

Notice how Zeebass's thread got closed in a record time of 15 minutes? and how Timo's didn't closure didn't come for an hour and a half later even with similar topics and posts with deal disputes and being open for longer, however it was closed within 10 minutes of my mention of it which aligns with Zeebass's closure time.

Again I have no proof this is just my speculation of it as you asked for explanation/misunderstood the follow up.

Windows RT clearly stated the account would be HAND TRAINED. Hand trained does not include AHK. I do not believe it is fair that you offer a service, lie to ur customer and have his account banned & then offer him 30mil and think that is fair... You're a scumbag Windows.

Windows are you going to pay him back?

It's sad that we have to go through all of this.. if only people followed and stuck to what they say there wouldn't be any problems..

Agreed I had poor hopes yesterday when I saw Windows thread about LSD, paying someone back is more important than getting high IMO.

Now it seems he has multiple new threads/post with no concern to this one. Sorry to hear about this OP, he did seem really fishy talking here.

Has this been resolved mr zeebas?

Zeebass - July 19, 2017, 1:17 pm

The dispute was never resolved. Sad User. I appealed the ban however my request was denied. He lost 80m and has no plans to repay me. Don't use this user.

Silent Uprising - July 26, 2017, 11:00 am

It's been nearly a month since Windows said he was going to pay OP back. Just read through this thread and Windows admits he is wrong. It kind if makes me angry that staff don't get involved in deal disputes...he admits to breaking the agreement between himself and OP. He says he will pay within 2 days...and still not resolved? That's literally scamming, nah?

If he has paid you back, and OP never updated the thread then my apologies. I didn't know if it was resolved.

Sadly the user hasn't ever paid me back. He even comments on my threads sometimes... I wish Staff would become involved and remove him from this site.
