Skills:

My skills mainly consist of Graphic Design, Game Design, as well as some Cyber Security aspects. I have been Graphic Designing for at least 7 years now, Game Designing for at least 4, and have been looking into Cyber Security for the past year or two. I am working on proficiency with HTML, PHP, Python, XML, and Lua. Furthermore, I am familiar with with CSS, C#, Javascript, Java, and Visual Basic.

What can you bring to Consensus?:

I can bring mostly my expertise in designing to the Consensus. I would say that I am very skilled in my field, and can complete work within a specified deadline exceptionally. Furthermore, I am a proficient writer, but there are still many things I can improve on, therefore that is something that I work on daily.

Previous Writing Contribution(s)/Work:

As of the moment I do not have any previous writing contributions. Although personally wise, I have worked to help re-design and write for my school newspaper in the past.

As for graphic design, you can check out my graphics shop here:

Previous & Current User Groups:

I never bothered to apply to previous groups, because I felt as if I was quite inactive in the community, and had trouble due to moving and such. Although I've since moved into my new home, and am going to begin becoming more active within the community.

Why should we accept you?:

I believe I should be accepted into Consensus because of my dedication in the aspect of everything. If a job is needed to be completed, that is my first priority. No matter the obstacles I am someone who doesn't give up, and I always have my priorities straight. I believe I can bring a great deal to Consensus in the aspects of not only designing and writing, but my activeness across HackForums.

Why do you want to join Consensus?:

I am interested in joining Consensus because of it's purpose. "A gathering place for sophisticated individuals who share an interest in cryptocurrency, the technology around cryptocurrency, and believe in helping the community of Hack Forums."

I have always been fascinated by crypto currencies, and the purpose behind the group fascinates me as well. Not to mention the fact that I believe on helping the HackForums community as well, and have been doing as much as I can.

Are you able to format threads properly on Hack Forums? i.e: [Crypto Sector News // #4](#):

Of course!

If you are to be accepted for this position, then what is your job going to be inside Consensus?:

Well, I would prefer to help within the Graphic Design department because after all, that is my specialty.
