Thread: [Refine This Logo](#)

Malevolent - June 28, 2017, 11:55 am

I need someone to refine this logo.

I want the the swirl part to be a new vector and the text could look better and more flowing as well.

Thanks to anyone who can try this!

AvessoVision - June 28, 2017, 12:42 pm

Careful. I made them quite big to fit all your needs. Took around 5 to 10 minutes. Cheers

I like where this is going.

Would there be a way you could make the swirl incorporate fairly even amounts of the red and blue? (similar to the original)

Essentially those are the company colors.

Thanks if you can!

Also the original was a bit more tight together and the six is more centered in the vortex.

Thanks!

Oh man the bottom two are super dope.

Btw I am sending you a +4 for the effort right now.

Could you try two more things for me?

For the middle one can you make the vortex half blue and half red? (just trying stuff out)

and then the other thing I wanted to try was all of the text outside of the vortex like the third one.

Do you by chance have Discord?

EDIT: Could you also try making the six in the second (middle) one white/a blend of white/red/blue, or white/light greys?

Thank you,

I do not use Discord actually. Wanted to but lost interest.

These are with the 6 more centered and switched the vortex and colors a bit.

That last one is excellent.

Could I see it with the outside text as using that same white/grey look maybe?

How'd you make those swirls? They look pretty dope.

Illustrator's basic tools. Swirl and stroke brushes duplicated and resized with layer opacity and such. Quick stuff.

Ah noted. Thank you in advance!
