Thread: [\[Custom Network-Identity.vbs\] - all work done in batch but with HTML-GUI](#)

ImDeepWithWindows - *June 29, 2017, 1:16 am*

this is just an update to my old post <https://hackforums.net/showthread.php?tid=5652969> but with a GUI build using html threw a vbscript object, im posting this in the batch section cuz the only thing thats vbscript in it is the display all the work is done in batch

source code is posted [here](#)

tell me what u think
