BEFORE YOU READ THE REVIEW

Spoiler [\(Click to View\)](#)

-You must understand that the reviews I make are from my point of view.If I grade 3/10 that doesn't mean the method itself is bad, maybe for other people that method is 7, so keep this in mind when you're reading my reviews.

-My reviews will probably piss off many people and break some of their businesses ...or raise them.This means I will not debate with the sellers whether or not my reviews are accurate.Unless there is really something wrong I won't recheck my analysis.

-I review good and bad products, not only bad products as some of you may suspect.In the end, remains the decision of the reader if it's bad or good.

FAQ

Who am I?Spoiler [\(Click to View\)](#)

-A random guy that bought dozens of methods in the past few months from HackForums Sellers, and with disappointment, I announce that 90% don't work or they require insane hard work to even get them started. Highly "vouched" methods, with "valid proofs" from so highly upper-class "highly vouched members/old members" or how you want to call them, methods that look good on paper but on practice leave you with a sour taste in your mouth and with dust in your wallet.

-For those that keep asking me, "who I am and how I buy for months but my account is only for a week". I've been on hackforums for awhile now, my first account was around 2009 but was disabled due to inactivity. I kept coming back.Never engaged in topics too much.Until 1'st May when I decided I should make reviews about products.

What I'm going to show you?Spoiler [\(Click to View\)](#)

Few angles to look at when you're buying a method and few insights of what each method consists of.

I will keep this short and say this - you don't have to become an investigator but in the end is YOUR money and YOUR time you're going to throw at a random guy that promises you the moon.

Spoiler ([Click to View](#))

(This is not rated as a money making method, therefore there is no grading)

-My PayPal is permanently limited therefore I can't execute this method even though I am very interested in a 1:1 exchange.

-You have to present some legal documents, not only an ID. This part can actually be a pain in the ass.

Current update.

An user brought to my attention the country this is supported and seems US is also not available. Nor India.

-Doesn't support most countries from Africa and Middle east.

-I do not like the fact that the website has a very bad support system. Their only support it's few bubbles that pop welcoming you and you can start conversations there. They answer very very hard, the website seems to be run by 1-3 people, not a company.

-After few googles about this website it seems, that is known around, there are few who ask about this website on forums, however, the responses are not that clear about this website. There are also many positive reviews, there are also few complaints on bitcointalk/trustpilot with people that randomly got locked out after paying and being asked again for verifications and never getting verified afterward.

-According to the support person with whom I spoke, the fee is [2%](#) + some other fees I've just found about.

-Some points are not that true. According to the discussion, I had with a support member the transaction is not 1:1.

I was given a copy to review myself, and the Method itself seems very viable.

I am in the process of verification to test the method fully. However I have to admit a bit of confusion with the notation of "Requires marketing" ?

Yea let us know, I couldn't see anywhere saying 1:1 even asked the support team. I removed that , it was not supposed to be there lol.

Denzarou - June 29, 2017, 6:08 am

Damn, that's the worst review I've seen yet. 3/10?

Here is the interesting thing, there is no website out there that will give you 1:1.WHY? There are FEES that will fuck the guy that sends BTC. The only way you'll receive a small fee such as 2-5% is through Debit Card, which by the way that you are able to use only on ATM.... or Buy a virtual debit card that gives you access to few markets around only EITHER WAY there is no way you'll buy 1:1 unless it's an actual person and by the looks of it it looks IMO like a scam.

Sickness - June 29, 2017, 6:30 am

Only time I've seen 1:1 was dealing myself with 1 day, successfull deal for \$50. Nothing more.

Well, I mean you ARE correct, but I think what the OP of this meant was there was no 10-15% type of transaction. Further I have spoken with support myself they noted there was only a charge for the actual transfer of \$1.50 per transfer.

So maybe there is a bit of confusion here. I am waiting to verify it myself.

Cyber Knight - July 2, 2017, 10:47 am

I really appreciate your review man. I do lack several elements that caused 3/10 review. I can not show any proofs because I do not want to risk exposing my identity. Like I said, this is almost 1:1. The website has been undergoing some changes and so they might have imposed some minor transaction fees.

But hey, look at it this way, the total fee is only 2%, that's it. Isn't it still better than 15-20% charged elsewhere?

After having dealt with site support myself, directly, I have to disagree with your overall stance on this "method" or M.O.P.

This works, and it is a exact exchange rate, minus the fee to transfer, which lets be fucking totally honest, conversion always costs something.

I feel you got frustrated over verification, which YES this does require, but its a breeze if your actually being legit... makes me question WTF you were doing? process was a breeze for me, I just had to re-submit more clear ID to verify, nothing more, nothing less.

I now have an awesome work around to conversions for having reviewed this. ??

Thanks a lot Armada for coming out with true facts. Mr reviewer has done a good job with it, but I do honeestly think the review could have been a little better. I blame myself not presenting the facts in a more likeable manner, but lets be honest, 1% withdraw fee from their wallet to your own is an external expense, so that doesn't count imo.

Its just 1%, for the overall "exchange" which is close to 1:1 isn't it?

If you verify your ID and shit, you could exchange pottentialy 100 grands every week at 1% and that's still better than 15-20% right?

I await Armada's review, a full detailed one on my sales thread. But hey, at least the method works. Even the support staff confirm it :)

TheSuspect - July 2, 2017, 5:07 pm

Is this method seriously just signing up for a website like WireX, verifying your account and then buying BTC with PP lol?

No, not quite as simplistic as that, and it actually has more benefits which I am not sure why OP is not capitalizing on.....

Where do you see 1% only?

That's 2% exchange fee + 1% unloading fee + 0.10\$ + 1% unloading fee + 0.0005(1.26\$) mining fee.

Let's say you buy 100\$ BTC With PP.

$100 \cdot 0.98 = 98\$$

$98 \cdot 0.99 = 97.02\$$

$97.02 - 0.10 = 96.92\$$

$96.92 \cdot 0.99 = 95.95\$$ -> That's the money you should receive. And this calculated without the mining fee which is another 1.26\$~

Is it cheap? Yea it is cheap. But it's not 0%, 1:1 or 1.50\$ only.

a little cheaper PLUS u give them all your legal documents. There are still better options out there. I don't mind giving a reputable company the documents required but this doesn't fit that description IMO.

On my BTC source, since I've been with them since the start all they have is my bank account and i have a limit of 10k € a week at 2.5-3%.

It's a lot cheaper then here, most people tend to sell at 15% some 10% and some above 15% 1 or 2% is great.

yea but you have to think about the purpose too.

Sending all your documents to buy 10\$ BTC to buy something you want would be pretty retarded whereas on here you can just pay the fee and get it done without too much hassle. If not getting scammed ofcourse.

For \$10 BTC obviously not worth it.. If you are buying large amounts eg \$3000 a week it's going to be worth it.
