xf0xalz - June 29, 2017, 6:54 pm

Hey guys !

Im interested in buying one of those and maybe make some profit, but they are really rare and expensive.

I heard that there are bots that can make you a request for you.

Also how this works ? When they will release Yeezy again ? They are always out of stock ! Do you need to live in a specific country ??

FamousHater - June 29, 2017, 6:57 pm

i think u mean an auto checkout like aio bot?

test - June 29, 2017, 6:59 pm

There are bots that automatically checkout pairs. I have seen a similar service offered here on HackForums before.

Freakyy - June 29, 2017, 6:59 pm

The latest ones released on the 24th

As far as I know, they have not released a new release date for another pair yet.

The bot uses early link or keywords so whenever the shoes go live it attempt to add to your cart and checkout with your information. You need proxies.

Even if you use a bot it's still not easy, but it gives you a better chance.

Btw the profit margin isn't that great as before. They're now releasing a lot more pairs than before.

It wouldn't be worth it unless you don't care about paying resell.

\$500 could easily get you a pair. Especially of the last two that released.

Also where Can I get a pair from ?The last two pairs that have released go for:

Cream Yeezys: \$400-\$500
Zebras: \$450-\$600(if you're lucky)

I honestly doubt you can get \$700 but who knows. I sell all of my pairs on eBay and not one has gone close to \$700, and I'm a top rated seller.

Not sure about if you're able to buy in your country but just checkout

Adidas.com/yeezy /kanye idk

There's a lot of shops that ship international so I'm sure you can find one

In the US there's a lot of online stores...

Adidas.com
Kith.com
Sneakernstuff.com
Yeezysupply.com

Ruvilla.com

Most are US only.

You get them for retail when they drop. With a bot or with luck and dedication.

When they drop they're on all the big shoe sites usually. adidas, yeezysupply, yeezy, footlocker, etc.

Flared - June 29, 2017, 9:07 pm

No, you probably can't get them even with a bot or if you purchase an autocheckout slot. Check <http://www.adidas.com/pt/> when the next pair comes out (August 17th WINK WINK). If they have pairs in portugal it should be relatively easy to obtain them because so little people go for them. Or your entire country could have no stock at all. Depends on how limited the release is.

I can't find anything about yeezy on adidas.pt lol .. my country sucks

If you're asking these type of questions, you shouldn't get into reselling.

Sneakers come out on certain dates at certain places. Get the AIO ANB either paid or find a cracked version (Paid is like \$200). Follow their setup and wait for a sneaker release. If you're looking for Yeezy's, follow adidasalerts and yeezy mafia on twitter and they'll tell you what days they come out.

The problem it's that Im not from US , I need people there to get my stuff and send to my country ...

Yeah , you shouldn't ask or search when you have question , that's for sure lol.

Yeezys are a sketchy market. Unauthorized fakes are getting more and more on point to the original thing every day.

Tonight - June 30, 2017, 11:26 am

If you don't know anything about the shoe it's way too late to try and hop on the bandwagon.

It won't be profitable for you and you're going to lose money.

Tro yeh - June 30, 2017, 11:27 am

In my country those shoes are for like 69\$
and the first copies are sold like around 20-15\$

This if you don't know anything about reselling, don't get started into doing it you can loose lots of money if you buy sneaker proxies (\$2-\$3 each), AIO Bot, some guy I know spent over \$500 on proxies and didn't get a single pair this release.

If you are going to try just try manual, don't buy a bot and tons of proxies unless you know what you are getting into.

Best of luck!

Have you looked into sending it to a reship like viabox or reship? Shipping rates may be high and not worth it though.

I used to flip yeezys and make bank.

They aren't normal proxies that you can use, sneaker proxies are much different hard to explain because I hardly know a lot about them.
